ITALIAN PREMIER STRIVES TO OUST POPULARS' LEADER

Benito Mussolini Sees in Don Sturzo an Obstacle to Electoral Reform Project

Party Congress May Soon Be Summoned to Show Majority Supports Leader's Policy

By Special Cable ROME, June 28-The duel between Benito Mussolini, the Premier, and Don Sturzo, leader of the Popular Party, becomes daily more interesting The Premier, realizing that the opposition of the leader of the Popular Party might not only render difficult of approval electoral reform in Parliament, but also encourage other parties to join the Populars against Fascismo, decided to use all his power to re-move Don Sturzo from the leadership

of the party.

But the Populars are strongly attached to their leader, and will cer-tainly support him during the present

It is expected that Don Sturzo will shortly summon a new congress of the Popular Party, in order to show Signor Mussolini that the overwhelming majority of the Populars support the present policy of their leader.

ROME. June 10 (Special Correspondence)—Although no one can deny that the general conditions of the country have much improved since the advent of Fascismo to power. that long-delayed reforms have been carried out and that the authority of the State has been re-established, there are still many who persist in creating disturbances, thus indirectly preventing Benito Mussolini, the Italian Premier, from completely carrying out his reconstructive program.

Strife in Party Ranks

Of all his opponents those who Signor Mussolini finds the hardest to contend with are his own people. For, strange to say, the party which ought to set the example of discipline to the whole nation is today torn into pieces by mutual jealousies, and is the only turbulent element which is causserious anxiety to the Fascist leader. It is true that one does not see the disorder, the struggle, the bloodshed which characterized Italian political life in the three years immediately preceding the Fascist conquest of power; but, while all the parties, and one may even include the Socialists, are living today in great quiet, and have almost abandoned their former hostile attitude toward the Government, the Fascisti are in contin-

In most of the regions the conflicts have broken out between Fascist leaders, each of whom, in imitation of his chief, is anxious to exercise dictatorial powers within his own province, resulting in the division of the Fascisti into two opposite camps. An explana-tion to this extraordinary phenomenon may perhaps be found in the fact that very little care has been given to the admission of new recruits the victorious party after October triumph: with the result, that within the ranks of the party there are today thousands of men who have merely joined Fascismo, as they would have joined any other party, to obtain a professional job, and would not hesitate to abandon it should Fascismo de-

Personal Antagonisms

The personal antagonisms are genate for himself a suitable electoral budget for an air war. Obviously the Premier believes But this advantage in the air is imthat the only remedy which can solve portant. An international conference the present internal crisis of Fascismo would be unable to draw any real disis the holding of political elections as early as possible. For only then will and a commercial machine. The domthe Fascist leader be really able to get rid of all the undesirables who that there is danger from Germany.

have flocked to his party. A very early appeal to the country eems to be one of the few certainties of the immediate future. The cause for holding early general elections is to be found not only in the fact that the present Parliament does no longer represent the will of the Nation-and on this particular point all parties agree—but also in the fact that the dictatorship of Signor Mussolini will come to an end on Dec. 31, 1923, and unless by the time of the ation of the plenary powers a new Parliament is elected, there might be the possibility of a return to old parliamentary intrigues, which Signor Mussolini might not be able to check It is the interest of Signor Mussolini and of his party to hold the elections at a time when they are still supreme.

System of Elections Had the Fascist Premier dissolved October revolution, his party would have certainly gained an overwhelming majority over all other parties. Has he today this certainty? Or will cisti that the sooner elections are held the better. In well-informed political quarters it is believed to the struction at Walkerville, Ont.

manders are prisoners of the French in the Ruhr, says the Düsseldorf correspondent of the Daily Mail. The first of these is Paul Adler, who is charged with compileity in the explosion that partly wrecked the Rhine-Herne Canal. The second is Otto Horden, accessed of sabotage in the Bochum district.

The third is Commander Rose, who navigated the U-53 in its trip to the American coast in 1915.

GERMAN AVIATION SEEN AS MENACE BY OFFICIAL FRANCE

British Preparations Give Rise to Surmises-Anglo-French Understanding Advocated

> By SISLEY HUDDLESTON By Special Cable

PARIS, June 28-There is certainly some response to the suggestion that there should be a meeting similar to the Washington Conference to fix limits to aerial development, just as limits are fixed to naval armaments But the French chiefly seem to think that as they have permitted themselves to be reduced to an inferior naval standard, they are entitled to some predominance in the air.

Perhaps it would be better at present, instead of trying to obtain a world conference on aerial armaments, for France and England to come to a preliminary understanding. The French Deputy, M. Foxey, who was a cele-brated aviator, in conversation with The Christian Science Monitor representative, pleaded strongly for the pooling of resources and the establishment of a Franco-British technica committee.

Much support could be found for this idea. On thinking over the British announcement that enormous aviation extension will take place, there is a growing feeling that this move directed against France.

Senator Borah has been outspoken in his opposition to Administration proposal for American adhesion to the court.

The President will not visit Boise Senator Borah's home city, but word was received aboard the presidential train early today that Senator Borah planned to greet Mr. Harding on his arrival at Pocatello and accompany him to Idaho Falls.

The program for the President's stop at Pocatello, in addition to the address, included an automobile tour of the city and review of the school children. After speaking from the rear platform of his train on arriving at Idaho Falls, the President planned to tour the city and then inspect a model irrigation district.

The presidential party crossed over into Idaho after two full days in Utah, a longer period than has been spent in other state. The visit to southern Utah and to Zion National Park, the newest of the Nation's play grounds, made a deep impression on both the President and Mrs. Harding.

Attired in the clothing of a ranger, including chaps and a 10-gallon sombrero, the President yesterday afternoon led a group, including Senator Reed Smoot and Gov. Charles R. Mabey of Utah, for more than three into Zion Cañon, following a trail along which it was only possible for horses to travel.

Joint meetings of the National Education Association and the world conference include plenary sessions on July 3 and 5 and a pageant of the nations in the San Francisco Expo-sition Auditorium July 4. The joint sition Auditorium July 4. The joint meeting will be conducted by the Pan-Pacific Union founded at the instigapromote better racial relationships or the Pacific where east meets west.

Education to Unite Nations

The conference is epochal and the outcome promising. Broader in scope than the Washington Disarmament Conference, the Educational Conference is potent to unite the nations because it is nonpolitical. The World Conference on Education, therefore, has cleared the decks for action to accomplish what the World War and enturies of others consistently have failed to establish namely interna-tional friendliness in a world gov-erned by reason instead of by fear and militarism.

The idea of this world conference (Continued on Page 3, Column 1)

LEAGUE TO EXPEND \$2,500,000 FIGHTING WET VOTE SEEKERS

Anti-Saloon Heads Focus Attack on Congressional Candidates and Answer Challenge

Will Enter 1924 Political Campaign for Purpose of Preserving Dry Laws of Nation

WESTERVILLE, O., June 28 (Special)—The Anti-Saloon League of America in conference here has announced that its campaign in 1924 for law enforcement, opposition to wet candidates for national office and perpetuation of prohibition would call for the collection and expenditure of \$2,500,000 and the most elaborate and determined fight against the forces seeking to weaken the Nation's dry laws that has yet been made. This preparation for battle is justified, the conference feels, by the assurance that the wets of America are to make their greatest struggle since prohibition to wipe prohibition statutes off the books. It was admitted at the conference of state superintendents that a special campaign on the issue of state en-forcement codes is planned this year or next by the league in 12 states, in-cluding New York, which has recently

Mr. Davis conservation. The world conference said that a prominent Democrat, whom is organized on the subconference he was not at liberty to name, has emphatically repudiated the move-ment for a wet candidate for Presi-dent declaring that such a nominee could never be elected.

Strong 1924 Program

On the question of the extension of the three mile limit Mr. Wheeler leagues had signified their intention exhausting all other methods it is found necessary to prevent rum-fleets from hovering close to American shores. The three mile limit he alluded to as both obsolete and inadequate.

It was announced at the confer-ence that a protest would be made against giving favorable recognition to any senator or representative who though holding church membership declares for beer and light wines after his election. The election or rentention of such men on church beards discredits the church and seriously weakens the impulse of the prohibition work, it was said.

The 1924 campaign of the league includes plans for wholesale publicity in newspapers and periodicals, extensive speaking and the general employ-ment of films in the interest of prohibition. Efforts will be made to have local organization speakers gain access more frequently than has been the rule to church pulpits. The cam-paign will center especially upon efforts to defeat congressional candi-dates whose attitude is unfavorable or whose record is prejudicial to the maintenance of prohibition and to pro-tect the state enforcement codes of the Nation from what is described as the "reprehensible acts of a pititful mi-

THE CHRISTIAN SCIENCE MONITOR

AN INTERNATIONAL DAILY NEWSPAPER Founded 1908 by Mary Baker Eddy

Published daily, except Sundays and holidays, by The Christian Science Publishing Society, 107 Falmouth Street, Boston, Mass. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, 75c. Single copies 5 cents (in Greater Boston 3 cents). (Printed in U. S. A.)

Entered at second-class rates at the Post Office at Boston, Mass, U. S. A. Acceptance for mailing at a special rate of postage-provided for in section 1103, Act of Oct. 3, 1917, authorized on July 11, 1918.

creased. Main exchange was said to be about what it was yesterday.

The strikers claim that Main has lost 325 of its 377 operators, Beach 364 of its 370, Richmond 115 of its 130 and Back Bay 230 of its normal 330. In a statement to the public the Providence Chamber of Commerce today said that the "strike of the telephone operators is not only an issue between a company and its operatives, but it involves and affects the welfare of the entire community and, if continued, will not only result in great inconvenience to merchants and

and State.'

to all business interests of the city

The telephone company received reports from all New England and said that Maine, New Hampshire and Vermont were 100 per cent effective. A slight improvement is reported from Providence, R. I., and from Springfield and Salem. In Worcester it was admitted that conditions were not all that is desirable, owing to the large number of inexperienced operators Lynn reported little change, and in Lawrence few experienced operators are to be had and the effective force is about 30 per cent of normal Natick reported a 30 per cent force, while Brockton reported a 75 per cent force, nearly half of which was of experienced operators.

Peace Efforts Futile

Efforts to bring about an understanding between the striking and nonultimate pay at the end of 51/2 years striking unions of telephone operators now, while the strikers want it to be yesterday failed last night, when both \$27 at the end of four years: \$17 has unions met in separate halls in Trebeen maximum pay at the end of two mont Temple in Boston. The nonyears, while \$24 is asked; and while strikers, Local 1A of the Boston Tele-\$18 has been highest pay at end of phone Operators' Union, of which Miss three years, \$26 is asked in new scale. Annie E. Molloy is the president, met in Tremont they were winning the strike and that Temple, while the striking operators members of new Local 1A of the warfare for better conditions as Telephone Operators' Department of Miss O'Connor said that the the International Brotherhood of Elecranks of Local 1A of the Boston Tele-phone Operators Union, of which Miss which Miss Julia S. O'Connor is presi-Annie E. Molloy is president, and dent, met in Chipman Hall. Police-which is standing by the telephone men were in the corridors to main-

The meeting in the main auditorium of the non-strikers quickly went on record against amalgamating with the members of the striking local, although it is said that Miss Molloy personally favored merging the unions and ending the strike, which she claims should not have been called.

The non-strikers voted down a motion that Frank H. McCarthy, New England organizer of the American Federation of Labor, be empowered to bring about arbitration between the two locals. The non-strikers refused with a whirlwind vote to join the strike and walk out today. This was done despite the fact that Boston Central Labor Union yesterday declared in support of the walk-out.

All Kinds of Rumors

All day rumors filled the air that Miss Molloy and Miss O'Connor were desirous of getting together. The telephone company issued no comprehenare being recruited steadily and that sive statement on the ground that the service in general shows steady improvement over what it was at the phone company officials were busy all phone company officials were busy all day trying to better service. The nonstriking operators' officers insisted that the strike had been lost, while Miss O'Connor said repeatedly that the strikers were gaining in many places. She said last night that the contest is as the girls who have gone out in an partment says: effort to get higher wages and shorter

proves that the strike is far more for- is also a future prospect.

midable than is admitted The strikers deny that the reports of restoration of service are correct in most cases. Operators were IN GREATER BOSTON shifted from one exchange to another many times yesterday, and today the company was bolstering up one spot

at the partial expense of another which could stand it. The state Department of Conciliation greater part of the afternoon, but they declined to interfere in the dispute.

WEATHER PREDICTIONS U. S. Weather Bureau Report

Boston and Vicinity: Showers tonight, probably Friday; cooler with moderate variable winds.

Northern New England: Partly cloudy and cooler tonight and Friday, probably showers in New Hampshire and Vermont and southwestern Maine; moderate variable winds.

Southern New England: Showers tonight and Friday; cooler with moderate variable winds.

Weather Outlook

In New England and New York the weather will be partly cloudy today, becoming unsettled by tonight, and will be followed by showers Friday, except in northern New England.

EIGHT-HOUR LIMIT FOR WORK FAVORED

Washington Statistician Testifies Before Arbiters in Trolley Workers' Wage Hearing

For a man to be placed in a position where economic conditions force him to work more than eight hours a day is a detriment, both to the individual and to society, declared Arthur Sturgis, Washington statistician, testifying today before the arbitration board which is sitting at the Massachusetts State House to hear the issues in the wage controversy between the emwage controversy between the em-ployees and public trustees of the Eastern Massachusetts Street Railway

Company.
While the issue before the board is purely that of wages, working conditions having been agreed upon, James H. Vahey, counsel for the men, urged the board, in his opening remarks, to base action on the fundamental of the eight-hour day and not on how much the men earn by working overtime and on Sundays and holidays.

Arthur G. Wadleigh, one of the rustees of the road, questioned the statistician, who has appeared on the abor side in many wage hearings. He elicited from Mr. Sturgis the declars tion that an eight-hour working day is enough. Mr. Wadleigh then demanded to know the statistician's opinion on whether a man should be allowed to work more than eight hours a day when he so desires

Mr. Sturgis replied that it is a question of degree, but when held to the exact point, he asserted that it should not be allowed. The statistican affirmed his belief in the absolute eight-hour day and declared that as a general proposition, working more than that is a detriment to society and the individual.

At the close of Mr. Sturgis' testi-mony, Mr. Vahey put into the records a statement of Lord Leverhulme, English manufacturer, in favor of a sixhour day. He read the statement, which declared that the shorter day will solve problems of unemployment, of education, of physical training and military training, and will be a long step toward ideal conditions which uld come out of the welter of war Report of the recommendation of a navy wage board for a 10 per cent wage increase for navy yard employees was read into the record. was also brought out that, according to the Federal Bureau of Labor Statistics, the cost of living in Boston is the fourth highest in the United States.

STRAWBERRY CANNING ADVISED

Now Is the Time to Preserve, Say Experts

Can strawberries now. Not again this season will they be so cheap or plentiful. This is the advice of the market division of the Massachusetts Department of Agriculture to the

nousewives of the State. According to the department, the native strawberry season has reached its height. From the "million-quart" strawberry patch at Falmouth on Cape Cod several carloads of this summer fruit are coming into the market every a hard one and that the non-striking day. Eight to 10 cents per box packed operators will not gain anything in crates of 32, 48 or 60 quarts is the should they win, but fare just the same wholesale price. Commenting, the de- Josiah H. Waltham High School exercises, held in Asbury Temple. Diplomas were presented by Henry F. Beal, Mayor, to the class of 99. The Robert N. Turner scholarship given by the alumni was divided this year, one-half going to Richard F. Hood, who is to enter Dartmouth, and the other to Willard E. Smith, who is to enter Amherst. A bronze tablet was given to the school in honor of George E. Morris, a former teacher, artist and naturalist.

naturalist. The graduating address at the Quincy High School was delivered by Alfred E. Stearns, principal of Phillips Andover Academy. Essex, Canton and Maynard also graduated large classes from their high schools.

PARENT-TEACHERS TO GIVE COURSES

Courses in school and home rela-tionships to be given this summer at Hyannis State Normal School, beginning July 16, and at Boston Univer-July 23, under the auspices of Massachusetts Parent-Teacher Association, Inc., are an important feature of the work of that organization, and mark recognition by educa tional authorities of its plea that parents should be trained for their duties, and that the work of the teacher has close relationship to the work of the home.

These courses follow an initial

course for parents given in the spring by the division of university exten-sion of the Massachusetts State Department of Education, and assure the continued co-operation of the state authorities in this educational activity. Both courses will be conducted Mrs. Winifred Carberry, national field secretary of the National Congress of Mothers and Parent-Teacher Associations.

Local organizations, which will map out their winter's work during the summer, are counseled to base their plans on a real need and a firm resolve to keep close to those things which mean a better chance for the child's development and a desire to bring into harmonious working partnership all the elements represented among the educators, teachers, parand citizens in their several

school communities. The Wadleigh-Prince Parent-Teacher Association of Winchester is distinctive among the associations in the State, as it acts as an open forum for the discussion of topics of interest to parents and teachers. The question for discussion at the closing meeting, "Shall the graduates of the elementary schools attend the Winchester School or a private school?" is typical of the searching and cogitative character of its work.

Besides doing big educational things, the Massachusetts association profited to the extent of \$1396.55 by its work at the Home Beautiful Exposition in Bos-Of this sum, \$1000 was placed in the endowment fund.

LIBRARY LOOKS FOR QUARTERS

"Wanted-a home," again is the cry of the proposed business men's branch rent all space.

The Boston Public Library is now in friendly suit with Trinity Church is not included. The suit is brought to determine if school appropriations must be included in the rating. If it does, it will be many years before the library will benefit by the bequest. If not, it will have from \$4000 to \$5000 to \$500

Congested conditions at the Central Library are to be relieved by the fitbeen unoccupied waiting for growth. The two floors will accommodate about 100,000 books, providing for about six year's growth. The library adds about 45,000 books a year to its collection but part of these are distributed among the branches.

BOSTON LIBRARY PLEADS FOR FUNDS

Increased Income Declared Imperative if It Is to Keep Scholarly Standing

Increased income, especially from private sources, is imperatively nec-essary if the Boston Public Library and serve the public as it has done is the statement made in the annual report of the trustees, made today.
The report is signed by Dr. Alexander Mann, now bishop of Pittsburgh;
the Rev. Arthur T. Connolly, Louis E. Kirstein, Judge Michael J. Murray and

Guy W. Currier. The examining committee says in summarizing its report: "The main points are: (1) A satisfactory scale of returns for all employees; (2) books; (3) light; (4) repairs and upkeep. Of greatest importance for the whole system is the establishment of a branch library for the business men of Greater Boston in the new building of the Chamber of Comerce. The lighting should be gone over in every library and reading and no expense avoided to ren-

der this first class in every respec The new report shows a substantial and gratifying increase, even against the handicap of insufficient funds for the maintenance of equipment and for the payment of adequate salaries. Charles F. D. Belden, the librarian, says:

Heads of departments and many of Heads of departments and many of the branch librarians report that never in the history of the institution has so great use been made of the reading-rooms and of the noncirculating col-lections. Bates Hall, the reading rooms in the special libraries department, the children's room, the teachers' room, the information office and the open-shelf room, in the central building, have often taxed beyond capacity. The same

been taxed beyond capacity. The same is true of reading rooms in many of the branches throughout the system.

The large increase in circulation of a year ago—223,870 over the year 1920-21—books was a direct result of the purchase of more books for circulation, made possible through the enlarged book appropriation of \$100,000. It was questioned whether the circulation for the current year would show a marked gain, but it is a satisfaction to report that the circulation far the past year was 2,768,984, a gain of 96,338 over the year 1921-22. ear 1921-22. In 1917-18 the total circulation of the

library system was 2,028,053; the five-year period, therefore, including the current year, shows a satisfactory gain in circulation of 740,931. With more oks, more branches, more service, the figures could be enormously increased; the Library Department, which received 1.03 cents on each dollar expended by the city last year, is on the threshold only of its opportunity for a greatly enlarged envise. larged service.

Among the requirements of the liorary, the need is especially noted of making some provision for the rapid future growth of the institution. The trustees in discussing the subject of "Private Aid for the Library,"

The Public Library is the only source to which the great masses must turn for their reading. An examination of the table of trust funds, printed as a part library for Boston. The new Chamber of this report, will show how small is the possible income to be derived therefrom. The last fiscal year it amounted to \$23,523.14. It will be noted that there are only eight funds in excess of \$25,000 Attention may well be called to the fact that the income from one of the two largest funds of \$100,000 each has given for the purchase of children's H. for the conduct of its public library indicates to the outside world its interest in things aside from the mere physical necessities of its people.

The trustees urge, therefore, upon private citizens who have been able to provide splendidly equipped home libraries, the crying need of Boston's thousands who hunger for good reading, denied them because unable to provide such for themselvea, and the great sarvice they may render their fellow citizens and posterity by private benefactions, the income from which will effectively help meet the ever-increasing definand upon the central library and its agencies. Surely, Boston, with its traditional pride, needs but to know the situation in which this great library now finds itself, in order to come generously to the

REFERENDUM ASKED ON FOREIGN BANK LAW

Preliminary papers for a referendum to the voters of Massachusetts at the state election in November, 1924, on the bill passed by the last session of the Legislature providing for the heavy bonding of individuals and partnerships engaging in a foreign bank-ing business, have been filed with the Secretary of the Commonwealth. The form of the preliminary petition bear-ing 10 signatures has been approved by the Attorney-General, and referen-dum papers on which to obtain the 15,000 names required within 90 days

The statute governing and regulating foreign bankers was passed as a result of the recommendations of a special commission of the 1922 session of the Legislature. This committee investigated the business of taking money for safe keeping and transmission abroad, which is largely carried on among alien residents or Americans of foreign birth. Certain abuses were discovered, according to the committee, and it was recommended that more adequate safeguards be established. The law finally passed was a modification of the committee's original proposal, and it was understood at the time of its passage to be acceptable to the foreign bankers.

ARMY OFFICERS JOIN HARVARD FACULTY

FIFTY NATIONS SEND **EDUCATION CHIEFS** TO WORLD SESSIONS

(Continued from Page 1)

developed at the National Association Convention in Salt Lake City three years ago and a committee on foreign relations headed by Dr. Thomas was settled European conditions but at the Boston convention last year the association definitely set the time and lace. The conference aims at the disarmament of the world's school textbooks by taking out "spread eagle propaganda" and hate and put-ting in constructive appreciative reference to foreign countries. More than 5,000,000 teachers and 200,000, 000 school children are to learn that all the nations hold many things in common. To invite recognition of this fact without bending to sentimental internationalism is the purpose of the conference.

"It should be understood thoroughly that this conference is neither a talk fest nor a academic indulgence of theory," Dr. Thomas told a represen-tative of The Christian Science Monitor. He added:

World peace cannot be attained in a day. But the disastrous, decentralizing influences which have multiplied unchecked in the textbooks of nations, in the very fiber of our social life, must be deleted if coming generations are to understand that France is not merely selfish or Germany vengeful.

Broader Patriotism

The World Conference aims to give patriotism a new meaning and vitality The old pleads pitifully for isolation, Washington's farewell address and Bismarck's code. The new patriotism will be more discerning but none the less appreciative of national character. It will respect the common heritage of all nations without invading the sanctity of national integrity or practices and customs peculiar to each country. The Conference is really crystallizing

a great idea developing among the na-tions. The League of Nations and World Court will not down. We think in world terms now and we are all but ready to so act. Today we read in the morning paper the events of interest the world around. This is forcing us to think in larger units, and so be citizens not only of one country but become world-minded for world citizenship.

I am impressed by the dignity and neerity being accorded the Conference by delegates of other countries and not one major country refused to send a delegation. They are all interested in methods of standardization international civics, scholarships, rural life prob-lems and the education of women. The world had little realized how much alike we all are until the world conference began to compare international ideas.

Elastic Program While we are setting up a program to guide the conference in its delibera-tions, it is by no means final, and new

questions be submitted to a council of nations to guarantee that questions upon which fundamental differences may oc-The National Education Association is

purely nonpolitical, nonsectarian and purely nonpolitical, nonsectarian and free from selfish motives. It is fitting that the World Conference is being held in America, which is most indebted to other nations because many of its ideas and ideals have been drawn from the four quarters of the earth and through our population, which is of all races

While today financiers and statesmen are seeking to settle a debt of the past, this conference will seek to settle a debt of the future. Education is the debt of maturity to youth and this generation has a direct responsibility to perform in the education of the oncoming citizens. This conference bids tells to open a new enjer in the advance. fair to open a new epic in the advance-ment of civilization by bringing the na-tions closer together in more sympa-thetic co-operation by developing those

The objectives of the world conference indicate clearly the vigorous significance of this international asembly. Briefly they are:

progress; to obtain more accurate and satisfying information and more ade-quate statements in the textbooks used in the schools of the various countries: the rising generation those spiritual values necessary to carry forward the fundamentals emphasized in the confer-ence on limitation of armaments; to emphasize throughout the schools of the world the essential unity of mankind against the menace of war and to stress the absolute necessity of universal

of trade; by the organization of text book material used in the schools such book material used in the schools such as will give a more accurate visualization of the dominant; traits, conditions and ideals of foreign countries; through the exchange of teachers and through scholarships to students of foreign countries; by a program looking to universal education; through an exchange of education setting forth programs and methods used in the various countries; and through an exchange of educations esting forth programs and methods used in the various countries; and through an exchange of educational periodicals; and, lastly, the designation of a day observed by all which may be known as world good will day, upon which such programs may be given as will promote international friendship.

CANADIAN SCRIBES TO TOUR HALIFAX, N. S., June 24—One hundred and fifty delegates of the Canadian Weekly Newspaper Association will tour the British Isles next summer and hold their annual convention in London, according to decisions reached at the final meeting of the convention here. The party will leave about the first of June, and will attend the British Empire Exhibition. The tour will last about six weeks.

Francisco. Fifty nations will be rep-

resented, Dr. Thomas said today to a GERMAN AVIATION ence Monitor.

"Look at these," and he handed out a sheaf of messages just received from Sweden, Japan and San Salvador. "We are assured already of a gathering much beyond our own expectations. Among the countries already repre-sented by delegations are Mexico Panama, Costa Rica, Bolivia, Japan, China, French Indo-China, Canada, England, France, Belgium, Germany, Spain, Italy Greece and Armenia.

Work of \$500 Cited

At a preliminary meeting of the advisory committee on foreign relations this afternoon, Dr. Thomas told how \$500, appropriated for that purpose at the last session of the National Educational Association, made possible the present world conference. Further sums for traveling expenses, publicity and general promotion could not be obtained, but, according to Dr. Thomas, the interest in the project was so great and the response of edu-cators around the world so instan-taneous, that extended preparations

were unnecessary. In speaking to the committee of the aims of the conference, Dr. Thomas

There will be ample opportunity for discussion, but discussion is not the purpose of this meeting. Time limits have been fixed for all speeches, 20 minutes constituting the maximum, and in the group meetings every phase of the problem under consideration will the problem under consideration wil be studied. But mere study is not the purpose of this gathering. We are met here, come from the ends of the earth, to bring our theories of world understanding through education down from the clouds to the plain level of

Definite Proposals

Every group session will have definite proposals outlined as a result of its SEIZURE OF RUM-LADEN LINERS intensive work. These proposals will be presented to the plenary sessions and there voted upon for final acceptance These co-ordinated proposals will serve as the basis for a co-operative world educational advance. It may be that there are only a few principles upon not believe it will be necessary."

This follows the opinion of Andrew which all nations can agree. However few they may be, they will serve as a starting point for more general agreement.

Interpreters have been assigned to as outlined just before his departure each of the foreign delegations and to Europe, that seizure of foreign all discussion will be translated into vessels would be an "unwarranted and " English, which will be the official language of the meeting. Group discussions will, in most cases, be led by an American, but the voting power is held equally by the nations represented. A general session devoted to four-minute messages from each country was proposed by Dr. Thomas at the committee neeting this afternoon

The final meeting of the conference will be a joint plenary session with the National Education Association in the San Francisco Auditorium. This session will hear the definite proposals of the world convention, and will constitute one of the most significant, certainly the largest and most widely representative gathering in the history modern education.

MAINE PUBLICITY TRIP IS ARRANGED

PORTLAND, Me., June 28-The State Department protests from for- ature plants, Ford engineers said. The members of the Portland-to-Portland eign embassies began to pour into money value of the new process is McGill University, we have made it the states for education. But war is party, who are to leave on the State Chamber of Commerce special, Sept. 2, for Oregon and the Pacific coast, plan to entertain Premier Mackenzie King and other Canadian officials on the outgoing trip. It is intended to make a three-hour stop at some point designated by the Premier, between Mon treal and Ottawa, where the function

will be held. "We are doing two things by this program, in addition to furnishing Canada with a generation of trained young men and women," said Mr. Harwood. "In the first place, we are diving out discounts. We have signed for the trip and indication." to sidetrack the bill in a miscellaneous guests of the party at luncheons, dinners, and other events when the west is reached. Sixty-five men and women have signed for the trip and indications. The place we are diving out discounter. We have signed for the trip and indications are that 140, the limit to be accommodated, will make the journey. guests of the party at luncheons, din ommodated, will make the journey which terminates in this city on

Sept. 25. The coast-to-coast trip is being taken at World Education Parley for the purpose of advertising Maine's resources and attractions and to learn what the west is doing.

kept abreast of the times and army pilots have had experience with the latest type craft.

The announcement of the British intention to increase their air strength to a point where it will be adequate to defend the country from attack by the strongest air force within striking distance, was not unexpected in official quarters here. For months it has been known that the British authorities were alarmed at the rapid growth of French aviation, and British air experts have repeatedly warned the Government that the French soon would have control of the British Channel through their superior strength in the air.

bill would have made it unlawful for any person who holds himself as competent to treat the "sick" or afflicted in the State in the capacity of doctor or physician to advertise or use such titles on office doors, or business cards without accompanying such title with words or letters showing the additional qualifications, and the degree upon which it is based. Mr. Sullivan's rehearsal of Gov-

Richardson's 20-year record ernor favoring medical freedom was a tribute to the Governor and disconcerting to the doctors. It was a strong argument in favor of the view that the Governor might have enter-tained fairly definite opinions prior to his veto of Senate Bill 331.

Preventive Paternalism

The American Medical Association by its election of Dr. Wilbur to the presidency, shifts in organization reliminary tests in a small plant at policy from curative to preventive medicine. This opens up new fields.

The distillation of soft coal at 1100 Dr. Wilbur said: "We must join in on the great game of constructive amount of by-products over the high temperature distillation process at living and make ourselves felt on the constructive side. By our failure to lead we are already being forced into a position that may be interpreted as obstructive to progress. The damage is that organized medicine may beome a defense organization.

A national physical examination for everybody is advocated by Dr. Wilbur in his expanding plan for medical paternalism:

"The idea is growing to have peri-odical examinations of the populace," he said. "Modern medicine is concentrating on throwing a shield of pro-tecting care around the average citizen. We physicians must think in terms of keeping our charges well rather than in terms of how to make continued seizure by customs officials necessary in the new distillation them well."

COLORED PHOTOGRAPHY ADVANC IS DEMONSTRATED TO ENGINEERS

Leader in Work Tells National Institute There Are Unlimited Possibilities in Field

SWAMPSCOTT, Mass., June 28 (Special)—"The possibilities of the new used in conjunction.
stereopticon and colored motion pictures are unlimited," declared O. A. C. Lund, of Lund Productions, Inc., at Lund, of Lund Productions, Inc., at tract special notice on the program, the Electrical Engineers Convention and when its effects are subordinated at Swampscott today. Mr. Lund, with to the story. Color in moving pic-W. Z. D. Kelly of Prizma, Inc., last tures will be the tool of the director, night demonstrated colored and stere-to heighten his effects, but it will not opticon films, made by new processes.

down upon him from the screen," Mr. Lund declared, "he would do one of two things, either let out a yell and go over backward, or attempt to throw himself at the 'onrushing' train."

Following an exhibition this morning by Francis Ouimet, golf expert, the members went into the fourth technical session at 10 a, m. One of

Mr. Lund's statement in an interview with the representative of The Christian Science Monitor was made to bear out the visual demonstration of his films last night. The stereoption of the institute.

This effective was a paper by H. Nuki-yama and K. Okabe, professor and lecturer, respectively, of the Tohoku Imperial University, Japan. Mr. Nuki-yama is an associate of the institute. con pictures given first, showing Washington scenes, which were previously exhibited on the trip of the Leviathan, made the foliage of the capital's trees "stand out" above the audience. The picture, viewed through nonmagnifying isinglass "glasses," with one red and one green eye, which were distributed in advance to the audience, did not itself appear in colors. It had the stereoscopic effect that gave the scene "depth," or three

New Process Explained

Mr. Kelly, inventor of the new process, explained this was obtained by taking simultaneous exposures of a scene, and superimposing these on one "positive." The red eye filter cut out all but red rays, and the green let only green pass. With the "glasses" one eye consequently saw only one picture, while the other eye caught the second. By separating the two images the film appeared to

the audience to have depth.
"The colored pictures," said Mr.
Lund, speaking of the second demonstration made last night, "are made on somewhat the same scheme of simultaneous exposures. Superimposed pictures are mounted on one positive. Treatment by chemicals brings out the color effects in a way which we believe surpasses anything at present on the market. We had only time to bring up one film of "The Falcon" from the story by Roccacle lest night with the story works of the General Electric Company, where the story is the story of the General Electric Company, where the story is the story of the General Electric Company, where the story is the story of the General Electric Company. the market. We had only time to bring up one film of "The Fatcon" from the

Subordinated to Story

Mr. Lund thought colored pictures would be increasingly familiar to audiences from now on, and would in time be coupled with the stereopticon This would not totally supplant the black and white pictures, he said, any more than colored illustra-tions had supplanted pen and ink

power have been set up for the sup-ply of industrial concerns.

The amount of water power har-nessed to replace coal in Austria has thus been doubled in three years, and the profitable nature of the enterprise has been fully proved. Capital in the country itself, however, is still so scarce that progress is necessarily slow, and very numerous opportuni-ties still exist for capitalists from ont-side.

The demand for the power such enterprises can generate is practically
unijunted, as the country has no coaldelds of its own, and the cost of transport from distant sources in Czechoslovakia and Hungary is necessarily
heavy in any case, and is rendered
almost prohibitive by the high duties—
amounting in some cases to 40 per
cent of pits' mouth value—imposed in
the countries of origin.

These hydro electric power installa-

These hydro-electric power installations are only one example of where endeavor is being made to reduce costs of production and therefore of living in this country. Another is to be found in the development of agriculture and especially of cattle breeding. Here the President is hopeful that the yield will be so much inthat the yield will be so much in-creased as eventually, in the cases of dairy produce and milk, to enable the whole of the internal demand to be filled without recourse to importation. When all sources of supply are developed His Excellency hopes that not more than 25 per cent of any foodstuff will have to be obtained from for-

All this is reflected in the streets of Vienna, where American and other visitors are now to be seen in num-bers not equaled since 1921. The President can thus point to material evidence already that his confidence

ONE BIG TEXTUF UNION IS PRESSED

Head of American Federation in Annual Report Makes a

Annual Report Makes a

Plea for Consolidation

NORWICH, Conn., June 28. (Special)

One large textile union, through the consolidation of the two major textile organizations, was urged by James Tansey, president of the American Federation of Textile Operatives, in his report at the opening of the eighth annual convention of that organization here yesterday. President Tansey occlared that the federation was willing to join with any movement which had this aim in view.

"We believe that the textile workers as a body are not receiving the full protection and benefits under present conditions as they would, if through mutual agreement satisfactory core.

conditions as they would, if through mutual agreement, satisfactory conditions could be arranged to bring together one organization of the textile workers of the country," said Mr. Tansey. "It can be done if all are really interested and sincere in their desires, and all arbitrary dictation and propositions are eliminated, and a willingness shown on all sides to give and take in the matter of concessions."

The report of President Tansey also

took up the issue of the repeal of 48-hour laws, condemning the action of legislatures which were responsible for the return of the 54-hour week in

In this regard the report says:

in the future is not misplaced.

COMPANIES GET INJUNCTIONS

NEW YORK. June 28—Ten gas companies of Brooklyn, Queens, and Richmond have obtained temporary in junctions in the Federal Court, Brooklyn, against the enforcement of the \$1 gas law, decreasing rates for gas. The injunctions were granted by a special statutory court, consisting of Julius M. Mayer, Judge of the United States Circuit Court, and Edwin L. Garvin and Marcus B. Campbell, District Court judges. Judge Mayer declared it to be the opinion of the court that the act was unconstitutional.

Do You Know That Fine Knit Underwear Is the Coolest for Summer?

The soft, absorbent quality of knit underwear takes up the moisture and through the many pores of the fabric, the air circulating freely, carries away much of the heat of the body—keeping it cooler than a fabric through which air cannot pass.

The fact that knit underwear may be washed easily and requires no ironing is a point in its favor in the summer.

REALTORS HEAR PLEAS TO BACK 'ZONING' AND BAN SKYSCRAPERS

Cleveland Convention Directs Attention Toward Legislative Problems—Curtailment of Public Expenses Urged

ticular interest to Ohio realfors, inas-much as licensing legislation has been proposed in the Buckeye State. No movement in recent years has

classes in a community as city zoning, Mr. Veiller said at this morning's session, in discussing "Mistakes to

He declared that homes of 27 per cent of the total urban population of the country are located in zoned communities. He added:

Zoning ordinances have been adopted in 109 communities; \$1 per cent of the urban population of New York State lives in zoned communities; in Califorial 71 per cent; in Minnesota 51 per cent, in New Jersey 57 per cent. More than 25 states have passed acts giving cities the right to zone. More than 75 trol of tax levies and bond issues.

Mr. Veiller denounced the lack of decision generally manifested in regu-lating the heights of building. He said that only where skyscrapers have a monopoly and face no competition of similar buildings are they found to pay. He referred to a study made by the Chicago real estate board which showed that above the height of 15 stories the financial return from additional height is negligible and beyond 20 stories unprofitable. The skyscraper in Chicago, he declared, is an economic and financial blunder.

POPULAR WITH AUSTRIAN FOLK

Wood From Railroad Waste, While Men Work

By MARJORIE SHULER VIENNA, June 10 (Staff Correspondence)-A cabman this morning an einspanner, one of the little onehorse carriages which are regarded with contempt by the real Austrian just as the two-horse flacres of Vienna have been the last word in elegance for public equipages in Europe. Today the fiacres are empty. The old days when one paid cheerfully what-ever drivers demanded have passed. The einspanner has its taximeter and. therefore, one rides in an einspanner However, even that payment is not to be undertaken lightly these days, for one gives exactly 7000 times what the meter registers. It was while I tried to multiply a three-figure fare with fractions that the driver uttered his bit of philosophy. "Oh, a thousand kronen more or less either way, what difference do they make? Money has no value today," he said.

What does Austria most need today? a question that is variously swered. The Government official hesitates not a moment in declaring 'national patriotism" to be the greatest "There is plenty of provincial "The Viennese love Vienna. The Tyroleans love the little."

Prices Too High "It is far more important that prices

shall drop," declares his wife. "Prices at the moment are higher than they have ever been in Vienna. It is an artificial inflation. It has no real foundation in the economic situation. It must change before we can see any solution for our problems."

The Viennese aristocrat who sets forth her slender supper at 5 o'clock when her friends drop in and shares it with them instead of eating it herit with them instead of eating it herself at the usual hour of 7, has an
even keener insight, developed by the
hardships of the last few years. "We
must be purged of our old easy-going
moral standards. We have to learn
honesty, and we have to place woman
in a position of respect. And best of
all, there shall be no future war for
us. Only the Tyrolese are fighters.
We in Vienna and the rest of Austria
hate war."

The waiter at the little restaurant protested: "We are now in the worst time of all, and it will not be better until we have another war. Germany will start it, but Russia will be with us this time. It will be the worst war the world has ever known." He is a native of the Tyrol.

Tyrol Alone Is Warlike

And so it seems that only from the Tyrol is there talk of war. The Austrian admits with engaging frankness that he has no intention of giving up the territory that has been partitioned to other nations, especially that section of the Tyrol which was allotted to tion of the Tyroi which was allotted to Italy. "But we look for a peaceful opportunity to take it back," he says. By which he means that Austria in effect says to the Czechs: "We must have coal. Send it to us and we will make a treaty that no one shall fight you on our soil." It says to Hungary: "We need the coal treaty that no one shall fight you on our soil." It says to Hungary: "We need thus and so. Send it, and we will make a treaty that no one shall fight you on our soil." Now Austria watches Italy and Jugoslavia with interest, hoping only for the moment of

The Christian Science Monitor is for sale on the following news stands in Toledo, Ohio:

CLEVELAND, O., June 28 (Special)

Delegates to the sixteenth annual convention of the National Association of Real Estate Boards today took up the problem of legislation as affecting real estate and realtors.

The morning general session was resolved into a sort of symposium on the subject of legislation finto which the question of zoning, a moot point among realtors, was injected through the medium of an address by Lawrence Veiller, of New York City, secretary of the association. The speaker favored the zone system and condemned skyscrapers as an economic mistake.

Judge William A. Hough, member of the Indiana state board of tax collectors, made a plea for the curtailment of public expenditures, and Gen. N. W. MacChesney discussed real estate license laws, a subject of particular interest to Ohlo realfors, inasmuch as licensing legislation has been.

CO-OPERATIVE SETTLEMENTS

Women Sew Community Garments or Gather Coal and

need when Italy must also strike bargain for neutrality, and that protested bit of the Tyrol will be the summed up the whole philosophy of Meanwhile the co-operative enter-the Viennese. He was the driver of prises serve to draw people together. When a family of eight or ten persons tendency should develop, an each-man-for-himself point of view. The Viennese dislikes the community idea. Co-operative eating places are en-dured, because of necessity. But cooperative settlements are a different matter. They are popular, and on the land some 70 settlements have sprung up, four of them on the sites of old fortresses which have been rased to provide stone for the houses.

Everybody helps with the colonies—men, women, and children. Only to-day two women.

day two women were mixing concrete before an unfinished house at the first of these settlements in the Emperor's shooting park at Lainzer Tiergarten. Another woman with a rose-wreathed knitting bag was filling it with wood dropped from the trees. Near the artists colony beyond Rosenhugel two women were picking over a great pile of waste from the railroad hunting for bits of coal. At Altmannsdorf women wooden doors which the men make in

the colony shops.
So it is that Austria is saving herself today. Not only for herself, but for the other nations. It is essential for the world that Austria shall become a wholesome place, a neutral place, where people are busy and con-tented, where there is no talk of war and destruction. Central Europe sadly needs a buffer state. Austria may be

Russian Gosplan Maps Resources to Develop Nation's Industries

Constructive Government and State Planning Commission Strives to Achieve Greatest Law and Order Defense to Results With Smallest Possible Waste of Energy

MOSCOW, June 10 (Special Correspondence)—One of the most distinctive features in the organization of Russia's economic life is the Gospian or State Planning Commission. This body, maps out the lifus of Russia's industrial development, Mr. Krzhijahovsky, a famous engineer, head of the Gospian, explained the workings of his organization. He said:

The Gospian plays the rôle of a controlling lever in Russia's economic life. It is divided into nine sections, which deal with such subjects as industry, transport, building, foreign trade, finances and peasant production.

The Gospian attempts to achieve the largest possible waste of energy. So we study the economic potentialities of the various Russian provinces. For instance, before the Revolution the Industries of Moscow and Petrograd were supplied with coal largely from the Donetz Basin, more than 1000 miles away. Under the pressure of the civil war the resources of the Moscow coal basin were exploited to the utmost, and it was found that this resulted in a great saving in transportation costs.

"Along what lines do you expect Russia to develop economically?" Mr.

AMERICAN MEDICAL COLLEGES UNDER POLITICAL CONTROL

Part of Chapter of Forthcoming Book by Asa Matthieu Tells Also of Effects of Unrestricted Vivisection

tors.

country

The following article is one of a series by Asa Matthieu, being a chapter of a forthcoming book on "Medical Politics," which uncovers the situation, as it exists in the United States, regarding propa-ganda and legislative bills to promote state medicine and similar autocratic measures. The articles are
not intended as an attack on the
character of the members of the
medical profession, but are simply
designed to expose the aggressive

ature of medico-political activities. This article tells of the dangers accruing from ultra-specialization, which has resulted in the passing of the old-time "family doctor," and his replacement by research workers and diagnostic specialists. It also takes up the subject of enforced hospitalization and the indiscrim-inate use of serums and vaccines upon helpless patients, as well as the subject of unrestricted vivisec-

Dr. C. L. Bonifield, of Cincinnati, O. writing in the Cincinnati Medical Journal on the subject of "Medical Education and the Future of the Medical Profession," says:

Some years ago, when noting the present trend of medicine education, in an address before the Ohio State Medical Society, the writer observed that if the time ever came when only a rich man's son could enter the medical profession it would be a bad thing for the profession, and a worse one for the public at large. That day has come.

The good old "family doctor," who knew little of modern medical practice, but was blessed with a good share of common horse sense, is fast passing out of existence. The presentday university course costs more than four years and \$4000. Medical politicians, by shrewdly steering giant phil-anthropic foundations, have gained control of practically all of the medi-cal colleges in the United States and Canada, with the result that the requirements for admission have been raised from time to time to suit the whims of faddist professors who worship at the shrine of two fetishes-research and full-time teachers.

Physicians everywhere readily admit that the medical profession is now almost in a frenzy of ultra-specialization, and that it is time to call a halt. They declare that medical colleges have all but ceased to train general practitioners and, instead, are practically training only specialists and research workers, whom they describe as "faddists." They assert that many of the professors in medical schools have contempt for the general prac-titioner, with the result that a num-ber of evils are rapidly developing.

Menace of Ultra-Specialization "The Menace of Ultra-Specialization in the Practice of Medicine," was the title of a paper written early in 1922 by Dr. Edward H. Ochsner of Chicago, president-elect of the Illinois State Medical Society. The following extracts from an address of so eminent a medical authority as Dr. Ochsner are of great public interest:

Men with general information and with a broad outlook upon life have discovered most of the worth-while things that have so far been discovered and the ultra-specialists have not made their fair share of the contributions along these lines. But this is not all. In addition, the latter have by their convenition as already clied. by their opposition, as already cited, sometimes delayed progress, have been responsible for most of the fads and follies in medicine and have sometimes discredited useful procedand making them ridiculous. In ref-erence to the last two accusations we need but recall the universal tampon of 30 years ago

While the microscope and the test tube have their proper places and important function, let those who worship at the shrine of these remember that they would have considerable difficulty in finding either a mouse-or an elephant with a microscope, and that, after all, all test-tube conclusions are based on tests of dead material and must be taken with a grain of salt. And let them remember, too, that, after all, the five well-trained, unaided senses are usually indispensable in reaching a correct diagnosis. If you want to find a needle in a haystack, be sure to employ an ultra-specialist, with his fine instrument, but be equally sure to indicate to him the particular-haystack in which the needle is concealed.

Absurdities of Medical Specialism

Absurdities of Medical Specialism The American Physician, October, 1922, goes to the center of the absurdities of medical specialism, when it

People are getting heartily tired of being sent from specialist to specialist, diagnosed and pawed over galore, and no real treatment administered. Patients should be considered as something more than scientific problems. After all, the patient is a human being, even as you and I. No matter what the development of medical science, the work of the medical profession still is and always will be to treat humans, whether to prevent disease or to cure or manage it. To so immerse students in scientific technicalities and to develop such an ultra-scientific zeal that they lose interest in the human beings for whom the science has been designed, is a case of the tail wagging the dog with a vengeance. A new emphasis of old truths is needed, and badly needed, and the longer neglected, the worse the need is going to become.

An address delivered by Dr. Mar-

An address delivered by Dr. Mar-tin H. Fischer of Cincinnati, O., at the banquet of the Ohio State Medical Association, May 3, 1922, treated the subject of specialism in a lighter view:

subject of specialism in a lighter view;

The present-day specialist is a selfanointed soul. He knows that to have
a large view in medicine means hard
work and broken hours; he sees an
"opening" for a specialist, spends six
weeks learning the necessary tricks
and succumbs to the easiest way. It
will be answered that specialists are
needed to do the complicated things
of blood analysis, bacteriological study,
and X-ray investigation. The truth
is that these newer things have not
become additions, as they should be,
to the older and established methods
of diagnosis and treatment, but lazyman substitutes for them—and poor
ones. In the main, these "scientific"
methods have not decreased error in

mine the most trivial facts, evidently carried on for the interest and pleasure of the research and the reputation it gives to the operator. Cruelties are inflicted and mans, animals ruthlessly and unnecessarily tortured for hours or days or even weeks in experimentation to solve some problematical idea.

The fads of college professors and laboratory experimenters, together with the activities of medical politicians, all interested in the scramble for foundation millions, are largely responsible for the vigorous protests madeb y antivivisectionists and the growth of these humanitarian organizations.

"Health Shows" Highly Profitable In New York City the Public Health

tion craze, is evidenced by their re-corded opinions. For example, Dr. Hamilton Fisk Biggar of Cleveland,

O., for many years the personal physician of the Rockefeller family, in an

address delivered before the Animal Protection Congress in Washington,

Many people believe that the statements of vivisectors are not altogether reliable when they proclaim discoveries for the relief of human suffering. It is too true that many of the reports are not reliable. Many of the vivisectors have not the true spirit for the advancement of medical science and consequently are severely criticized and their work thoroughly discredited for they claim originality and priority in some of the problems for discoveries that are already known and obtained by other methods.

There are fallacies in vivisection—many so-called discoveries that have not endured the test of clinical experience and that have not been useful in alleviating human suffering and prolonging and saying life.

Too frequently the most horrible experiments are performed to deter-

diagnosis or broadened treatment. Chemical methods of blood analysis have not enlarged our knowledge of kidney disease; failures to obtain, positive bacteriological findings have permitted patients to go without a diagnosis where an older generation of doctors would have judged correctly the nature of the disease from its signs and symptoms; while the case of looking through a patient with X-rays has dulled the touch, the sight, the hearing and the judgment which made great our predecessors.

The specialist fad has also taken a The fads of college professors and laboratory experimenters together with the activities of medical politicians, all interested in the scramble for foundation millions, are largely responsible for the vigorous protests made by antivivisectionists and the growth of these humanitarian organi-The specialist fad has also taken a violent hold upon public health officers and state medicine promoters.

RADIO SHORTHAND CONTEST
NEW YORK, June 25 (Special Correspondence)—Anna Kirschenbaum of the Brunswick High School in Brooklyn won the recent radiophone shorthand contest conducted in the city high schools, making a record of birt three mistakes in the contest of 100 words. Dictation was broadcast from WJZ station. In New York City the Public Health Department indulges in the specialty of "health shows." These exhibitions, which resemble a county fair, are highly profitable to salaried physicians as a means of disseminating propaganda printed at public expense. A 200-page book, with a dozen pages devoted to the program is crammed.

SUCCESS OF RECOGNITION PARLEY HOPEFULLY WAITED BY MEXICANS

Economic Future of Nation Held to Depend on Outcome-Business Reflects Unsettled Conditions

MEXICO CITY, June 19 (Special everyone is keeping a tight clutch on his meager savings and awaiting iscussiond of the prerecognition onferences continue, economic conditions in the capital as well as throughtions in the capital as wall as throughout the major part of the Republic as
getting worse. For since the conferences started six weeks ago, business
has practically been at a standstill.
Banks report less movement, merchants are not replenishing their
stocks and the public on the whole
is refusing to buy. These peculiar
phenomena are due to the fact that
everyone is waiting to see how the
conference will turn out.

The pessimists are constant in their
allegations that if the conferences
fall, times will be worse than ever, a
few have gone so far as to even predict a new revolution, the overthrow
of the present administration and the
substitution of the Constitution of 1867
for the revolutionary one of 1917. So

The American delegates have pointed out repeatedly that the United States does not ask that Mexico change its laws, but that it obey them and enforce them properly; neither have they fallen into the trap of proposing any written suggestions, for it for some unfortunate reason the conferences should end without anything definite having been accomplished, the first thing the Mexican Government would do would be to say that here are the demands the United States laid down to which we could not accede.

accede.
On the other hand, however, the delegates of both countries are imbused with a sincere desire to see the conferences to a successful conclusion. The major time of the American commissioners is now taken up in studying the various reasons why Mexico cannot give definite assurances without certain allowances being made. Its present agrarian law is the culmination of more than a century fight against feudalism and actual slavery. its petroleum laws on which the ques-tion of subsoil rights revolve, the result of hasty legislation, whereby revolutionists sought to replenish a depleted treasury of a poverty stricken

suggestions and plans have been laid before the American delegates by the before the American delegates by the Mexican Government for their consideration and possible approval, which may make it possible for Mexica to give the assurances required this being dose. pearing to have sacrificed any of those ideals or aspirations upon which the present Mexican administration is founded and which at the same time will pacify the critics who con-

Modern Agricultural Institution Expected to Quicken Development of West Indies

PORT OF SPAIN, Trinidad, B. W. L., June 1 (Special Correspondence)

Agricultural societies are numer in the islands and have been quite a cessful in pushing betterment proje. The native planter, who usually on a plot of land for cocoa cultivative profited from the activities of the societies, but there was still son thing lacking to make the island dominant in tropical agriculture was favored as an occupation and, as such failed to interest the state of the societies. Agriculture was favored as an occupation and, as such failed to interest the younger generation. The youngemen and women who leave the colonies to study abroad, the scholarship winners, and the ambitious folks, never looked upon agriculture as a profession worthy to enter. They saw little opportunity, as far as the West Indies was concerned. This fact is supported by the crowded lists of lawyers, doctors, dentists, and business man in the several islands. Seldom does one hear of a West Indian leavdoes one hear of a West Indian leav-ing his home to study agriculture

To offset this impression and to elevate the profession in the eyes of the rising generation, the Trinidad Government added an agricultural scholarship to its regular one. It was a step forward in intensive agriculture; Students went abroad, one each year, to study agriculture and then returned home. The process was slow, as such opportunities were confined to a few-

Estimated Consumption

The estimated total gasoline consumption in 1922 in states which passed gasoline tax laws was 2,607,000,000 gallons out of a total domestic consumption of 5,366,600,000 in that year. The estimated yield of gasoline taxes in 1924, levied in 35 out of 48 states, is \$41,607,890, based on the 1922 registration of 12,239,114 cars and trucks and an annual consumption for each vehicle of 424 gallons. and trucks and an annual consumption for each vehicle of 424 gallons, the average estimated by the National Automobile Association. The estimation is 1000 gallons for each truck and 358 gallons for each passenger car, but 10,793,930 passenger cars greatly outnumbered the trucks, thereby lowering the combined average. Cars and trucks now in use number about 13,500,000.

With a license tax only, owners of cars pay no tax for the use of roads outside their own state, but payment for such use can be collected by means

of a gasoline tax.

NORWAY'S EXPORT MARKET EXPANDS

In April Reaches Value of 66,-800,000 Kroner, Compared With 57,100,000

Now Taxed in 35 States Compared With 18 in 1922

The new or increased taxes on gasoline are evidence of the tendency of state legislatures to increase the revenues available for the construction and maintenance of highways, and at the same time effect more equitable distribution of costs. The states with gasoline laws show an increase from 18 in 1922 to 35 in 1923.

The total registration in all states of 12,239,114 cars and trucks brought in a total registration revenue of \$152,-047,823 in 1922, of which \$117,993,115 was applicable to state road work. Collections in 1923 will be largely increased by the greater number of cars on the roads and a tax of 2 cents a gallon, effective June 1 in Indiana, Aug. 1 in Colorado and Sept. 30 in California. The first and last named are among the largest consumers of gasoline.

With 57,100,000

According to the latest official statistics, just made public. Norway's export market is steadily growing. The value of the exports in the month of April amounted to \$6,800,000 kroner as compared with \$7,100,000 kroner for the corresponding month of last year. In the first group the exports as compared with the preceding year, increased from 20,000,000 kroner to 23,000,000 kroner; in the second group from 8,000,000 kroner.

In particular the export of klipfish shows a noteworthy gain. It increased from a quantity of 3.47 tons in April of last year to 29.30 tons in April of last year to 29.30 tons in the corresponding month of this year. The exports of the first four months of the year reached a volume of 255, 300,000 kroner as compared with an amount of 236,100,000 for the corresponding period of last year.

LARGE NUMBER OF STOCKS LOWEST SINCE LAST IULY

NEW YORK, June 28-The com NEW YORK, June 28—The com-bined market averages of railroad and industrial stocks at the close of busi-ness last night were the lowest since last July. One hundred and sixty of the stocks traded in yesterday sold at their lowest prices of the year.

While most of the liquidation has been for the account of professional trust companies report a large volume of transfers for holders of small amounts many of whom have held the stock for long periods.

OHIO STEEL FIRMS' DIVIDENDS GAIN

YOUNGSTOWN, O., June 28-The July 1 dividend distribution here approximating \$3,000,000 by local industrial, banking and commercial houses will be about \$1,000,000 greater than at the bottom of the post-war dip.

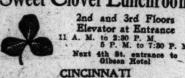

About one-half of the total will be paid out by the Youngstown Sheet & Tube Co., which is paying \$1.25 a share on 978,606 shares of common and the quarterly disbursement on \$14,250,-000 of preferred. The Trumbull Steel concern follows with \$390,000.

Thomas R. Deacon

Thomas R. Deacon is president of the Manitoba Bridge & Iron Works, Winnipeg, Man., the largest plant of its kind in western Canada and the ploneer in the steel fabricating industry. Mr. Deacon also is president of the Manitoba Rolling Mill Company, Limited, which manufactures practically all the bar iron used in the three prairie provinces, and of the Manitoba Steel & Iron Company, Limited, a wholesale jobbing and merchant company in steel and iron goods.

A native of Lanark County, Ontarlo, Mr. Deacon graduated from the school of applied science, Toronto University, in 1891. Early in his career he assisted in a survey of the National Park Reserve at Banff, exploration surveys in the Rocky Mountains, and a survey of part of the Algonquin National Park Reserve, Ontarlo. Later he became superintendent of construction of the North Bay (Ontarlo) waterworks.

For 10 years, following the discovery of gold at the Lake of the Woods, he was actively engaged in mining, engineering and surveying, with headquarters at Kenora, then Rat Portage. In 1897, he became manager for the Ontarlo Gold Concessions, an English company, and after holding that position two years he was appointed managing director and consulting engineer for the Mikado Gold Mining Company of London, England, then operating the principal gold producing mine in Ontario.

In 1902, realizing that western Canada was due for a rapid expansion, Mr. Deacon moved to Winnipeg and in conjunction with H. B. Lyall, now HOMAS R. DEACON is president of the Manitoba Bridge & Iron Works,

In 1902, realizing that western Canada was due for a rapid expansion, Mr. Deacon moved to Winnipeg and in conjunction with H. B. Lyall, now vice-president, formed the Manitoba Bridge & Iron Works.

Mr. Deacon, aside from his preminent business interests, has a distinguished record of public service. At Rat Portage he was alderman and acting mayor for a year. In Winnipeg he originated the plan, now in effect, which assures the city of an inexhaustible supply of soft water. The electors, indorsing his plan, elected him Mayor for two terms, 1913, and 1914, during which Mr. Deacon perfected the organization necessary for the construction of the 90-mile, \$15,000,000 water project.

He was a member of the royal commission appointed by the Manitoba Government in 1910 to report on the necessity for a workmen's compensation act. This commission brought in an unanimous report and drafted an act which was enacted as contained in the report. He is a member of the Manitoba good roads board, a member of the council of the Winnipeg Board of Trade, a member of the executive council of the Canadian Manufacturers' Association and other bodies, and was president of the Winnipeg Canadian Club for 1915.

LACE INDUSTRY INQUIRY PLAN

Committee Will Try to Find Remedy for Marked Depression in English Trade

NOTTINGHAM, June 20 (Special Correspondence)—Lord Henry Bentinck said, in the House of Commons, that it is proposed to set up a committee to inquire into the cause of the present distressful conditions of the lace trade. Never in the history of the trade has there been so great a depression, and the unemployment and distress caused thereby is unprecedented.

A great part of the home trade is captured by foreign competition, chiefly Calais. The rate of exchange enables France to undersell, and therefore places the manufacturer under a serious disadvantage in the home market. The Federation of Lace and Embroidery Employers' Associations have been urging the Government for several months to impose a duty on imported goods.

The chief asset of the lace industry is its export trade, but because of the conditions of the industrial world.

The chief asset of the lace industry is its export trade, but because of the conditions of the industrial world since the war and excessive tariffs these markets are practically closed. The manufacturers, therefore, reason that it is all the more important that they should not be "cut out" of their home trade.

At present in Nottingham and district it is estimated that 75 per cent of the machinery is idle.

LAMBS HIGHER IN A RATHER UNEVEN LIVE-STOCK MARKET

CHICAGO, June 28—The general live-stock market was uneven in appearance yesterday, with irregular prices in the cattle section, somewhat lower quotations in hogs, and strong to higher prices in sheep and lambs.

Receipts, prices and conditions

Receipts, prices and conditions were:

Cattle, receipts, 9000; general market draggy; very uneven; all except strictly choice beef steers, yearlings and beef cows and helfers, unevenly lower; many yearlings is to 250 off, or 100 under last week's high; on matured steers, \$11.20; best yearlings, \$10.50; bulk youngsters, \$369.50; grassy cows, almost unsalable; some going at \$3.5004.50, according to quality and condition; choice grade fed cows and helfers, score about steady; bulls, strong; vealers, about steady; bulls, strong; vealers, about steady; country demand for stockers and feeders, very narrow; bulk desirable bologna bulls, \$4.5004.90; bulk desirable vealers to packers, \$8.5009.50; bulk stockers and feeders, \$8.5009.50; bulk stockers and feeders, \$8.5009.50; bulk desirable realers to packers, \$8.5009.50; bulk desirable helfers, \$7.5002.25.

Hogs-Receipts, \$2.000; very slow; better kind around 10c lower; others uneven; spots, 15 to 20c lower; bulk desirable 160 to 275-pound average early, \$7.25; packing, \$6.1006.40; pigs, very scarce; some big packers out of market at noon; holdover, 14.000.

Sheep-Receipts, 8000; good and choice rative lambs, \$18.250 15.50; top, \$18.50; culls off, mostly \$9; medium and handy weight fat ewes, mostly \$506.50; deck good 100 pound aged wethers, \$7.50.

HAYES WHEEL'S EARNINGS DETROIT, June 28—The Hayes Wheel Company reports gross earnings for the first five months of 1923 of \$8,000,000, compared with \$4,700,000 in the similar period of 1922.

ENGLISH LEATHER HOUSES TO HAVE **NEW LOCAL AGENTS**

No. 112 Beach Street, in the Boston leather district, on July 2.

The concern has obtained sole representation in the United States of three large English leather concerns, namely Barrow, Hepburn & Gale, Ltd., of London; Highfield Tanning Company, Ltd., of Runcorn, Eng., and William Mortimer & Co., Ltd., of Warrington, Eng.

A display is to be made of sole, belting and welting leathers manufactured by the English firms.

A long lease of the property has been obtained by the local concern.

NO NEW WELLS IN OLDER CALIFORNIA CRUDE OIL FIELDS

SAN FRANCISCO, June 28—The report of the California oil and gas supervisor says the week ended June 23 is the first week in many years when no new wells were started in the oider California fields.

New wells started numbered 24, compared with 15 in the previous week, of which eight were in Santa Fe Springs, 10 at Long Beach, one at Huntington Beach, two at Torrance, the rest scattered. The total new wells in 1923 to date have been 741, compared with 522 last year. There were 13 tests for shutting off water, compared with 45 the previous week.

GOOD GAINS BY SOUTHERN PACIFIC CO.

Balance Earned for Com Stock Expected to Be About

equal to at least 12 per cent on fitshould show its junior dividend

March.

May revenues crossed the \$22,000,000 mark for the first time-this year,
but operating expenses also bulked
the largest this year. The May ratio
of expenses to gross was 73.83 per
cent, or approximately the same as
that in March, at 73.85 per cent.
March gross was \$22,922.088, compared with \$23,160,155 in May, white
operating expenses consumed \$16.

pared with \$23,160,155 in May, while operating expenses consumed \$16,-938,594 in March, compared with \$17,101,376 in May.

For the five months the road operated at a ratio of 76,51 per cent of expenses to gross, as compared with a 79,40 per cent ratio during the corresponding period of 1922 and \$3,20 per cent in 1921. The more favorable ratio this year reflected a \$11,181,000 gain in gross, and an increase of only \$6,740,000 in operating expenses; therefore, there was a \$4,310,000 gain in net railway operating income.

in net railway operating income.

The following figures represent increase in gross and operating penses, the operating ratio and railway operating income for the five months of this year:

FIRST JAPANESE INDUSTRIAL ISSUE APPEARS IN LONDON

LONDON, June 28—The first Japanese industrial issue offered to the British investing public appeared yesterday in £2,000,000 6 per cent bonds of Tokyo Electric Light Company. The authorized total is £6,000,000, of which half is to be offered at 94. The company was founded in 1886, and is said never to have missed a dividend. Although the new bonds are not a mortgage, they are an unconditional obligation, and the company undertakes to permit no further charges on the property while the long to other property while the long to other property.

The profits last year were £ 2,293,949

Our Duty to the Public

Our responsibility to the public requires that telephone service, temporarily disorganized in a few places, be restored as rapidly

When the emergency was but a threat, preparations were made to protect the public against the inconveniences and dangers of interrupted service, as far as it was possible to do so.

When the threat became a fact, it failed to be effective because of those preparations and the instinctive loyalty of the great body of our operators, who maintained normal service in 90% of our central offices and gave some measure of service in all of them.

We are giving all our thought and energy to the problem of restoring service as promptly as possible in those communities where it has been affected. With the continued co-operation of these communities great progress in this direction already has been made and will continue until the desired result is successfully achieved.

New England Telephone & Telegraph Company GEORGE H. DRESSER, General Manager.

NEW YORK STOCK MARKET SPOTTY

NEW STEEL SHEET MILLS
YOUNGSTOWN, O. June 28—The
Newton Steel Company is completing
10 new sheet mills. This will give the
concern 20 mills, capable of producing
10,000 tons of high-grade sheets
monthly. This will be the highest production of any independent company
specializing on high-grade sheets.

BOUNTY R COPPER PRODUCTS
TORON June 28—The Dominion
Government has passed the copper
bounty bill providing for a bounty of
1½ cents a pound on copper rods and
bars produced in Canada from Canadian
ore for home consumption. The bounty
will work on a sliding scale for five
years.

RAILWAY STOCKS **SHOWING LARGER** YIELD JUST NOW

Heavy Liquidation of These Issues a Prominent Feature of the Market

Liquidation of railroad stocks in the last few days has been a prominent feature of the stock market. Commensurate with the selling by investors of their rail holdings the yield on the investment has increased.

At Wednesday's low Atchison, pay-

ing \$6 and earning more than double this figure, shows a yield of 6.14 per cent. There is more possibility of the dividend being increased than reduced. Atlantic Coast Line is returning 6.23 per cent with earnings more than double the payment. Chesapeake & Ohio is yielding more than 7 per cent, and Canadian Pacific more than 6%

Lehigh Valley shows better than a per cent return and New York Central 7.13 per cent. The latter will earn more than double its present dividend this year and the stock was placed on a \$7 basis partly with the object of getting in the convertible bonds. To accomplish this the stock must sell before May 1, 1925, at say 107 or 108 to make the conversion feature profit-

Northern Pacific and Great Northern preferred are both showing a return of around 7½ per cent. The next change in these dividends should be upward to probably a \$7 basis. Southern Pacific shows a yield of more than 7 per cent and Union Pacific more than

The strides that Southern Railway is making in development and earn-ings indicates that the preferred divi-dend is safe. The yield at current prices is 7% per cent. St. Louis South-western preferred paid dividends from 1909 to 1914, when they were passed. Payments were resumed last fall at a \$5 per annum basis. The road is earning at the rate of better than \$20 a share on the preferred. At 541/2 the preferred stock yields 9.19 per cent. A list of railroad stocks and yields at

BANK RATE UNCHANGED LONDON, June 28—The minimum rate of discount of the Bank of Eng-land remains unchanged today at a per cent,

RUBBER EXPORTS ON DOWN GRADE

Total of Restricted and Unrestricted Areas in May Estimated at 29,000 Tons

Promiscuous granting of license and rubber "bootlegging" are considered to have had much to do with the fact that unofficial estimates of May exports of crude rubber from both restricted and unrestricted districts in the Far East place the total at 29,000 tons.

That these practices are being cor rected is indicated by estimates of May exports which place total ship-ments from restricted areas at 17,800 tons, compared with the total allowed under the Stevenson restriction plan of 18,000 tons.

Based on the price prevailing in the first quarter, when the total permitted to be exported was 60 per cent, the plan in the second quarter allowed for a 65 per cent release. Export figures, excluding May, since the Stevenson plan became effective Nov. 1 exceeded materially the amounts called for.

The prospective decrease in exports is also taken to mean that stocks in the primary markets, of which no accurate estimate is obtainable, have

been practically exhausted.

The hurried exporting of crude rubber from the Far East in anticipation of restriction made the total for last October abnormal. Since then exports from both restricted and non-re-30,000 tons, as follows: May, 23,000 tons (estimated); April, 32,985; March, 34,635; February, 29,887; January, 34,-116; December, 28,781; November, 32,-

Approximately one-third of the above totals comes from the unre-stricted area. The fact that exports of crude rubber from primary markets have not increased in line with record consumption so far this year has been due to large stocks in London at the beginning of the year, which resulted to some extent from hurried October shipments. On Jan. 1 the total London stock was 72,203 tons. In the last five months it has been reduced to less than 52,000, a normal six weeks'

In the first quarter the United States consumed 96,000 tons, compared with imports of 89,000. Imports of 36,184 tons in May brought the total for five months of this year to 157,105 tons, considerably more than the 1922 total. Consumption to the end of April averaged approximately 31,000 tons a month, but May consumption is estimated less than this figure, so that for the first five months imports added to stocks in the United States.

Design and the second consecutive week. Loadings exceeded the corresponding week of 18,596 cars and the corresponding week in 1921 by 231,925.

Loading of forest products totaled 78,058 cars, an increase of 1678 ever the week before, 15,672 over last year, and 27,495 over 1921.

Ore loading also continued heavy, for the week ended Jane 16 being 79,298 cars, an increase of 3206 over the preceding week. In the first quarter the United States

has been due to an unfavorable sta-

MARINE'S PAMPHLET REPORT SHOWS A **DEFICIT OF \$2,408,061**

International Mercantile Marine Company has issued its pamphlet report for the year ended Dec. 31, 1922. The profit after taxes and fixed charges amounted to \$3,576,599, as compared with \$10,378,658 in the preceding year. After deducting depreciation of steamships, there was a deficit of \$2,408,061, compared with a surplus of \$4,260,678 or \$8.23 a share, on the \$51,725,000 preferred stock in 1921.

The report shows the following combined income account of derived from operations of American Red Star, White Star, Atlantic Trans-72,000.000 port and Leyland lines and dividends

dus. †£2.029.056. *Includes £100,000 first preferred dividend, £216,542; second preferred dividends, £1,936,574; interim dividend on ordinary shares paid in January, and £2,420,643 final dividend on ordinary shares, payable in June, 1923.
†Subject to provision for excess

The growth in operating revenues of the Carolina, Clinchfield & Ohio, lease of which to the Coast Line and Louisville & Nashville has just been announced, is clearly shown in the upward trend of the two heavy lines on the accompanying chart.

It will be noted that although the Clinchfield is primarily a coal road, the increase in total operating revenues since 1915 has been greater than the increase in revenue from coal traffic, indicating that the tonnage, handled is becoming more diversitied.

CLINCHFIELD'S GROWING REVENUES

handled is becoming more diversified.

The slump in net after 1916, notwithstanding the continued increase in gross, is partly the result of the factors which increased operating costs all over the country, but is also due to the fact that it became necessary to materially increase maintenance expenditures, which had been abnormally low, because the line had recently been constructed practically as

RAW MATERIALS FORM LARGE PART OF MAY'S IMPORTS

WASHINGTON, June 28—Crude materials intended for use in manufacturing in the distributed 39 per cent of the total imports into the United States during May, the federal Department of Commerce announced today. Manufacturing the country in the nine months commerce announced today. Manufacturing the country in the nine months ended with March, 1923, compared with 50 per cent in 1922.

The total value of manufacturing material, crude or partly manufacturing material with manufacturing industries of the United States formed no less than 58 per cent of the total merchandise entering the country in the nine months or partly manufacturing material with march 1923, compared with 50 per cent in 1922.

Exports: Raw foodstuffs \$25,997,000, compared with \$34,151,000; foods ready for consumption, \$49,130,000, compared with \$50,369,000; raw materials for use in manufacturing, \$53,-302,000, compared with \$64,374,000; manufactured commodities, \$130,848,-000, compared with \$112,161,000; partly manufactured products, \$50,-302,000, compared with \$40,422,000. Inports: Raw foodstuffs \$28,839.

Imports: Raw foodstuffs, \$28,839,-000, compared with \$31,264,000; foods ready for consumption, \$59,892,000 compared with \$34,785,000; raw materials for use in manufacturing, \$144,-924,000, compared with \$87,877,000; manufactured commodities, \$65,320,-000, compared with \$58,268,000; partly manufactured goods, \$73,774,000, com-pared with \$39,595,000.

DIVIDENDS

American Shipbuilding Company de lared four quarterly dividends of 2 pe

clared four quarterly dividends of 2 per cent each on the common, payable Nov. 1, Feb. 1, May 1 and Aug. 1 to stock of record Oct. 15, Jan. 15, April 15 and July 15 respectively. The regular quarterly 1% per cent preferred dividend was also declared, payable Aug. 1 to stock of record July 14.

The executive committee of Continental Can Company, Inc., recommended to the board of directors a quarterly dividend of \$1 be declared on the common stock, payable Aug. 15 to tsock of record Aug. 4. The present rate is 76 cents quarterly. The board will meet July 11.

Pittsburgh, Cincinnati, Chicago & St. Louis declared the usual semianual dividend of 2 per cent, payable July 20. The company is leased by the Pennsylvania Railroad Company.

Indiana Pipe Line declared the regular quarterly \$2 dividend, payable Aug. 15 to stock of record Aug. 18 to stock of record Aug. 20 to stock of the Pennsylvania Railroad Contract of the stock of the Pennsylvania Railroad Contract of the stock of the Pennsylvania Railroad Contract of the stock of the Pennsylvania Railroad Contract of

tarte-stock loading amounted to 28, 461 cars, 458 less than the week be fore, a decrease of 723 under 1922, but an increase over the week before the second and the property of the facal year 1914, all of second and the prevent of the facal year 1914, all of second and the prevent of the facal year 1914, all of second and the prevent of the facal year 1914, all of second and the prevent of the facal year 1914, all of second and the prevent of the facal year 1914, all of second and the prevent of the facal year 1914, all of second and the prevent of the facal year 1914, all of second and the prevent on the common and 1½ per cent on the common and 1½ per cent on the prevent of the pre

dend of \$1.50, payable July 20 to stock of record, July 7.

Merchants National Bank, Boaton, declared the regular quarterly dividend of \$4 per cent, payable July 16 to stock of record June 30.

Maspachusetts Trust Company declared the usual quarterly dividend of 2 per cent, payable July 2 to stock of record June 26.

National Enameling & Stamping declared the regular quarterly dividend of \$1.50 on the common, payable Aug. 30.

BALTIMORE & OHIO

The Baltimore & Ohlo road's estimated net income for six months ended June 30, 1923, is \$12.758,350, after taxes and charges but before preferred dividends and the appropriation required under the terms of the collateral goldon. This compares with \$4,836,500 in the first half of 1922. The preferred dividend is payable Sept. 1 to stock of record July 14.

RAW MATERIALS IMPORTED BY UNITED STATES

Upon Foreign Countries

The importation of "crude material for use in manufacturing" will approximate, according to the Trade Record of the National City Bank of New York, \$1,500,000,000 in the fiscal year which ends with the current month, compared with \$909,000,000 in the fiscal year 1922, and \$1,051,000,000

the fiscal year 1922, and \$1,051,000,000 in the fiscal year 1921.

Raw material for manufacturing formed in the nine months ended with March no less than 39 per cent of the total merchandise entering the United States compared with 35 per cent in the fiscal year 1922 and 29 per cent in the fiscal year 1921 in the fiscal year 1921.

Crude Materials

These figures relate exclusively to crude materials and do not include the group "manufactures for further use in manufacturing," which formed 19 per cent of the imports of the nine months ended with March compared with 15½ per cent in 1922 and slightly less than 15 per cent in 1921.

Combining these two groups of crude material and manufactures

WASHINGTON, June 28—Crude mafor further use in manufacturing, it

oil, nickel ore, and copper, while the partly manufactured articles for further use in manufacturing include lumber, vegetable oils, nitrate of soda. wool and cotton yarn, pig tin, and diamond cut but not set. There is also a limited quantity

of fron ore of a class especially suited for mixing with domestic ore. Tir of considerable importance, coming in this form from Bolivia, which exports most of its tin in the form of ore, while other tin producing sections of the world smelt their ore and export it in the form of pigs and bars.

Tropical Products

The total value of crude material imported for use in manufacturing in 1900 was \$276,000,000; in 1910 \$566,1928, to all stockholders of record at the class

%c to 1%c higher, with September \$1.02% @103% and December \$1.05@1.05%, were followed by some further

like advance, September 77% @78%c, the corn market underwent a material

GOVERNMENT'S MARKET NEWS IS EXTENDED

Entire Country's Main Centers Are Covered by Telegraph and Radio Service

Special from Monitor Bureau

WASHINGTON, June 28-The United States Department of Agriculture is extending its market news service to cover the country's main market centers from coast to coast. To do this it is establishing one of the largest commercial leased telegraph wire and radio telegraph systems in the world at a cost of approximately \$700,000. The leased circuits are in daily operation from 6 a.m. until 6 p.m.

velopment of code are more intensively used than other wire systems. All traffic is scheduled and controlled by the Washington office and is transmitted simultaneously to all the big market centers.

During the night the Washington office receives hundreds of telegrams from railroads reporting the movements of perishable commodities, giving the origin, destination, quantity and other facts. This information is

except Sunday, and through the de

sent to branch offices next morning. Following this, live-stock reports pany has booked within \$9,000,000 of the total bookings for 1922, and algard to agricultural products, market quotations, and other matters of interest are sent out.

PHILADELPHIA, June 28—Baldwin Locomotive will start the third quarter with approximately \$55,000,000 of unfilled orders. By a coincidence the amount of business booked from Jan. 1 to date is approximately the same as the unfilled orders, \$56,000,000. During the corresponding period last year the business booked was \$11,500,000.

Demand for engines developed during the second half of 1922 and total bookings for that year were \$65,000,000, compared with \$28,000,000 in 1921. In the first half of this year the company has booked within \$9,000,000 of the total bookings for 1922, and al-

quotations, and other matters of interest are sent out.

At the end of the day market summaries on all commodities are dispatched to more than 2000 newspapers. Special reports are also prepared for radio telephone or telegraph broadcasting stations and transmitted to offices of distribution.

The information received over the wirea at the various branch offices is immediately communicated to producers and the trade by telephone, telegraph, radio, and the press.

Consuming centers are also advised as to the supplies of various producers. This enables producers to require the supplies of various producers to require the supplies of various producers.

This season, it is newed buying will set in before the year is over.

A large part of the present orders is for parts, as roads which have shops of their own are expending large spins in putting equipment into response in putting equ

must be handed to the county commis-sioners before 12 o'clock if it is to be considered. I meant to send one of the men, but the water is so high this morning that I can't spare one of them. We'll be doing well if we save

the bridge."
"Yes," said Tom, eagerly, "Fil take the papers for you."

Mr. Satley thereupon handed Tom a sealed envelope. "Take good of this, Tom," he said, "and be sure to tell no one where you are

ing, nor what you carry." said, "and see if one of the men won't market every day." And, with that, Tom left Little Bill and started back to the farm, where the two bars.

A few minutes later. to the farm, where the two boys were in the habit of filling their pails.

About two hours later Little Bill was climbing nearer and nearer to the took the pails and started to the zenith. Five miles stretched between White farm to refill them. As he trudged along the road, what was his surprise to come upon a long sealed envelope lying in the grass. The boy stooped and picked it up. As he had suspected, it proved to be the very envelope which Mr. Satley had given into Tem's keeping such a short while

Little Bill felt quite perplexed. "Dear me!" he said to himself, "Tom has lost the bid and is probably riding to Springville this very minute with-

Little Bill's Responsibility

He took off the old felt hat which he wore and put the envelope carefully inside the crown; then he put the hat back again on his head and began running along the road in a jog trot toward the farm, in the hope of finding out when and how Tom had

and started on his journey.

To his eager questions Mrs. White answered: "Yes, Tom was here about two hours ago. I was sorry none of the men could give him a lift, but we weren't sending anything to market this morning, because the creek is too high to cross in a car. The old bridge went down last night in the high water."

in June, to visit some cousins. One cousin, Estelle, had just gradu-

ated from Art School and was making jewelry. She had a box of beautifully

colored semi-precious stones, which she allowed Marjorie to run through

eggs and make sandwiches. Finally, the baskets were piled into two cars

and the picnickers climbed in on top of them, sitting in all sorts of funny, twisty positions, for, when there's a picnic, the lunch baskets have first

rights.

Estelle was very silent on the trip,

and kept staring at the backward-flying landscape, as if she expected to see some friend lurking among the leaves. When anyone spoke to her,

just left her undisturbed.

My real story begins after lunch had been eaten and the Twins we're exploring the wonderful, mysterious woods. Like happy goats, they ran up and down the ledges of rock where little streams trickled under hlueblack trees. All at once Marjorie stopped. "Oh, Tim," she cried, "somebody's broken a necklace!" Saying this she picked up from a crevice a handful of many-colored stones. Some were green, some pink, others blue, rose or yellow. Many were an inch long and some even longer, and 'in shape they were a little like the pictures of snowflakes which the Twins

tures of snowflakes which the Twins had seen in a book.

The excited children rushed back to the group of older people. "We've found a broken necklace," they cried,

The Boy Called Little Bill

They called him "Little Bill," because he was short of stature; and this teased him, for he was strong, wiry, and old enough to be "water boy" for a gang of workmen building a new bridge over Sugar Creek, under the direction of a contractor, named Satley.

Tom Hagen was the other water boy. He was tall for his age, so that the workmen treated him as if he were almost a man. Even Mr. Satley had a way of looking upon Tom as the more reliable of the two boys.

One day the contractor approached the boys, as they came down the bank of the creek with their pails of drink fing water, and, slingling out Tom, said: "Tom, do you think you can get these papers to Springville before noon today for me? I've made a bid to build the new courthouse, and it was plain enough that the rivable Ginger had become confused and was swimming upstream, breasting the swift ourrent. Try as he would, Little Bill sing the swift ourrent. Try as he would, Little Bill knew that it was she ing the swift ourrent. Try as he would, Little Bill sing the swift ourrent. Try as he would, Little Bill sing the swift ourrent. Try as he would, Little Bill sing the swift ourrent. Try as he would, Little Bill knew that it was she ing the swift ourrent. Try as he would, Little Bill knew that it was swimming upstream, breasting the swift ourrent. Try as he would, Little Bill knew that it was the man's name. He's a contractor in Tylertown.

Little Bill stared thoughtfully at Swiftle Bill stared thoughtf

foot it," he said; for, country boy that he was, he knew that Ginger must not

On and on he ran. Once an automobile whizzed by, but, though Little Bill raised a hopeful arm, the driver did not pause. Little Bill gritted his teeth and increased his speed, his short legs fairly flying over the ground, while his wet trousers flapped against his sturdy legs. At last the boy saw the red root of the old courthouse, glowing through the maple trees of the county glowing seat. That sight gave him fresh strength. He made a last sprint and bounded up the steps of the court-house two at a time. As he cleared the last step, the town clock began the first stroke of twelve. There was no time for ceremony. Little Bill burst into the room where the county commissioners sat in session and, leaving a watery trail in his wake, laid Mr. Satley's bid on the table before the

chairman.

Of course, the chairman asked a question or two, which Little Bill had just breath enough to answer. Then Little Bill went out into the courthouse yard and rested under a tree, until he was ready to start home. The ride home was made easy for him by a farmer who gave him a seat in his car, and, picking up Ginger, let the horse jog behind them all the way back to Sugar Creek. By taking a long way around, they found a safe bridge.

Moos-wa, the Moose

NE day, when my brother and I were camping in the New Brunswick wilderness, we padded around a bend in a stream and found ourselves within a few yards of a big moose. He was standing on the bank above us boking against the evening sky as large as an elephant tie had a wonderful pair of hornsnot alim and branching like a caribou's, but wide as a shovel, with short prongs sticking up like the points on a crown. For a few seconds we scarcely breathed. We stared up at the moose and the moose stared down on us. Then, suddenly, he decided that this was no place for him and started off for the nearest woods at a started off for the nearest woods at a citing time. Other animals seem to NE day, when my brother and I

Books for the Country

H. AUN'T LUCY! We've just that time on he opened our book-money boxes and will you tell us some through the lovely new books to buy to take to the country?" exclaimed Mary-Maud, as she with Sammy and Dot burst into the room. "You know everything about books."

"How splendid!" said Aunt Lucy, after she had listened to their excited account of the money each child had. "I want to buy a book," urged Dot,

who was the youngest.
"So you shall, my dear." Aunt
Lucy lifted Dot and her precious box
of money on to her lap. "And I know
just the one for you. Listen to this:

"Say some more!" Dot begged.
"Oh, that would spoil your summer
fun. Mother and sister will read the fun. Mother and sister will read the rest to you. Can you remember the name of the book? It's 'A Child's Day,' and it's all songs about Elizabeth Ann and the things she does all day long, just as Dot does. All about getting dressed and brushing her teeth, about rainy days and her Teddy Bear and the Dustman and Dreamland. Walter da la Mara is the read. land. Walter de la Mare is the man

"But what shall I get?" urged "I have more money than

Let's see, you like to know about boys in foreign countries. 'When I Was a Boy in Denmark' ought to be just the thing. It is the story of a real boy, what he does, the games he plays, his school and customs that seem strange to us. The words, with their queer spelling, such as Koengens Nylorv and Köbenhavn, will amuse you. It has a let of pictures, too."

"Is it a story-book?" asked Sammy. "Yes, the true story of a real boy. It isp't exciting like 'Treasure Island.' If you want adventure, you'll have money enough to buy 'Hugh Gwyeth, too. That's the story of a boy who lived in the exciting days of the struggle between the Roundheads and the Royalists. Do you know anything about that time?"
"We had it in history, I guess," although Sammy didn't seem very sure.
"Well, the book is exciting enough.

to make your curly hair stand up straight and you'll learn ever so much besides, without knowing it, for you'll be so interested in the story. So there are your two books. Now for Mary-Maud."

"I've got almost \$4," volunteered Mary-Maud. "Suppose you put three of it into one book and save the rest for a nest-egg. You've had such a happy time with your Thornton Burgess Bird Book. Should you like one about flowers?"

"Is there one, really?"

"Yes just published. It has alst the second of t

"Yes, just published. It has pictures of over 100 flowers, many of them colored, and all so perfectly done that you would know any of them if you saw them growing."
"Is Peter Rabbit in this, too?"

Mary-Maud was all eagerness.
"Yes, it's the all-summer story of Peter and the flowers from the time Old Mother West Wind's Children, the

"And now," said Aunt Lucy. "I'm going to give you the books I've bought for you to take to the farm." Taking one from the rable, she handed it to Sammy. "You're the one boy in the family, so here's "The Story of Our Constitution." I know that sounds a little serious, but even a vacation should sometimes be a little serious. Mary-Maud ought to read it, too; for, since we women vote, we must know as much as the men about our country. And really you'll enjoy it, for it is told like an interesting story."

"Thank you, Auntie," as Sammy took the book. "I'll read it in small doses if it's too hard for hot days."

"For you." Mary-Maud, here is a

"For you, Mary-Maud, here is a lovely book of fables with beautiful colored pictures. You know your Esop pretty well now, but this has the fables of all nations, even Ameri-

can Indian ones."

The children rushed out of the room

as eagerly as they had come in, for they must tell Mother all about what they were going to buy and show her their new treasures.

Below is a list of the books which these children planned to read:

An Egyptian Child's River Horse

Who was the child that played, about 4000 years ago, with the toy hippopotamus that is shown in the Metropolitan Museum of Art? Of that we know nothing. But we do know that somebody—probably a child—played with that miniature "river horse," for that is the exact meaning of the word hippopotamus. The little figure is made of clay,

and its back is gayly decorated with the blooms of the lotus, that grew so lentifully on the banks of the Nile thousands of years ago, as it grows

One of the remarkable things about this statuette of a historic animal of the Nile country is that it looks just like a "hippo," and like nothing else. Nobody who has any idea of what a hippopotamus looks like would mis-take it for an ox, or a cat, or a monkey. It's just like the hippopotamus you see wallowing about at the "zoo."

The man who made that historic Merry Little Breezes, hinted that spring was coming and sent him to hippopotamus had made a study of the Green Meadows and the Great river horses. And river horses have Forest to see if it was really true, hardly changed a particle since those He finds the first spring flower, From remote days.

International Schoolboy Friendships—Their Values

Special Correspondence WOULD seem that 300 English colboys had been "adopted" by the French. The schoolboys thought that they had but gone over to France to visit the devastated villages their towns in England had adopted, but the French Government, which issued the invitation, knew better than that.

entente," a name suited to the times and withal, a kindlier, more affectionate term.

The 300 schoolboys from 28 towns in England and Scotland who went to be entertained by the French for four whole days will have happy memories of France always; they will have an interest in learning the French language; they will do business more easily with the French later was the best for the boy who was not good with his books.

To Know France

"France will no improve the precially by secondary and grammar-school boys came-as well. The opportunity was not confined to clever children however. A Kensington master said that he thought that the education of traveling was the best for the boy who was not good with his books.

To Know France

"France will no improve the precially by French boys.

In August, 300 English schoolgirls are to have the same opportunity of earning French ways and wisdom.

Suggests a Month

"If I get a chance," said Mr. R. Domville, headmaster of North Kensington Central School, who accompanied the boys, "I shall suggest that French boys and English boys ex-change places for a month not only in the schools but in the homes—they should sleep in each other's beds, live each other's families-then they would really understand each other's lives and each other's language."

How far they are at present from that understanding was illustrated by an incident on the platform at Victoria before the train took the boys on their

way to France.
"I'm going because I'm the best French scholar in my school," said a

boy from Bristol. "Est-ce-que vous parlez Français très bien?" asked a reporter. The boy took to his heels and fled down the

"It will be quite different in France," said Mr. R. B. Thompson, headmaster of Buckingham Terrace School, Ken-sington, "the boys will 'absorb' the language. When the tram conductor says 'Complet!' and rings the bell, the poys cannot help knowing that 'com plet' means 'full up' in French."

Educational Values Before they started, one boy at least knew the value of French money. He went round collecting French coins from his schoolmates and relations,

lose and much to gain by taking the voters of the city into its closest con-

fidence. In particular is there wide-

spread and favorable approval of the new Bulletin of Education, through which the bureau of research strives

to broadcast its investigations and

the children of his neighbors. The

bulletin, in entirety, is a product of

the school system. The articles are

written by teachers and members of the administrative force, are edited by

the research experts and the whole publication is printed by the pupils and on the presses of the vocational

The current issue, containing as it does a description of the way in which

Baltimore seeks to solve the problem of educating immigrant children,

makes much more than a local appeal. The so-called "steamer classes" in the

public schools of the city are not, as

the bulletin asserts, unique, but they are rare enough to be in the nature of

pioneer effort and successful enough to

merit imitation. These classes, as de-

scribed by Miss Helen Stromberg, principal of School No. 93, are made

education. Some of them are wholly

lish, and the task of the steamer class teacher is first to teach them to un-

derstand and speak the language of the land. Not until that is done is there

cepted in the sixth grade and many others are in the grades to which

Those who are in the best position

to judge the value of this work give it their heartiest approval. Says Miss

Stromberg: 'When we place these children in steamer classes immedi-ately on their arrival in America,

their progress is decidedly marked, whereas the child who has first been

Intellectual Workers Form an International Confederation

organizing the intellectual works sity. In March, 1930, the "Confédéra-tion des Travalleurs Intellectuels de France" came into being and in Aus-tria the Central Council of Intellectual Workers was started. In Great Britain the National Federation of Profes-sional, Technical, Administrative and sional, Technical, Administrative and Supervisory Workers was organized. The next stap was to get into touch with the intellectual workers of other countries and while here and there meetings were held the first international congress of delegates from other countries was called at the Sorbonne at Paris this spring.

The British delegates were impressed by the sincerity of the great gathering and by the fact that though many of the organizations represented differed from each other in certain aims the points of contact were many and numerous.

Confederation of the Arts In Great Britain there is a new movement called the Confederation of the Arts, which aims at co-ordinating societies rather than individuals. It is hoped to bring together some 4000 art societies in Great Britain not only for sesthetic but for economic and social action. Mr. George Latham is chairman of the organizing committee of the B. C. A. and president of the Intellectual Workers National Federation in Great Britain, and the two forces will work together in close sympathy. The federation already numbers 350,000 members so here is a vast force which, rightly directed,

may be the precursor of a great re-naissance. The reasons which brought forth the French organization are the same which gave the inspiration in England namely the anomalous position of writers and journalists, of painters, designers, architects, engineering de-signers, the men in short whose intel-

SUMMER OAMP
PRILICAN LAKE, WISC.

Lake Forest, Adjutant's Office, Illinois

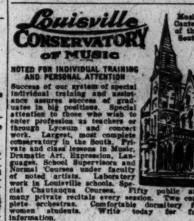

In his closing speech the chair I. Henri de Jouvenel, Freelegate to the third Assembly of

delegate to the third Assembly of the League of Nations, summed up the situation by asking that between employers and workers there was a large class of persons whose interests were represented by neither. The intellectual worker was, in fact, the victim of an unconscious conspiracy between employers and workers. A spiritual element of intellectual finship would now be introduced by the organized intellectual worker in the hitherto materialistic struggle between Capital and manual Labor, Perhaps in the future their services might be used as arbitrator between the opposing forces, thought rather than mere numbers leading the world. Mr. Cloudesley Brereton, who with Miss Amelia Defries and Mr. Malcolm Thomson represented the British Confederation of the Arts at the International Conference, presented the idea that the movement in its larger sense expressed the revolt of quality against quantity. The organization of a Confédération des Travailleurs Intellectuels in every country would provide a body of "competents." practia Confederation des Travailleurs in tellectuels in every country would pro vide a body of "competents," practi-cally a "third chamber," to advise th Nation on all professional, cultural technical and administrative ques-tions. The official languages of the new International are to be French and English and the eventual linking up of the intellectual workers of all nations is the goal in view.

TWO AMERICANS MEET TOMORROW

Elimination of Johnston or Richards Will Take Place in World's Single

WIMBLEDON, June 28 (AP)-W. M. Johnston and Vincent Richards, the leading American players in the Wimbledon tournament, continued their winning tennis today, and will meet tomorrow to decide which shall continue in the race for the singles championship of the world.

The prospect of a struggle between the American stars was the leading topic among British tennis followers and is certain to draw a large crowd. Royalty graced the boxes at the Stadium today as play was re-sumed in the final tournament for the world's grass-court tennis titles. Former King Manuel of Portugal, with his consort, watched the centercourt matches from the royal box, and King George and Queen Mary of England arrived at 3 o'clock after two sets had been played in the match between B. I. C. Norton and J. D. B. Wheatley. Thus they were on hand for the feature match between Vincent Richards, American star, and J. Brug-non of France, which was the next scheduled on the grand stand court.

The weather was warm and pleas ant. The stands were packed with thousands of spectators, while a great overflow crowd watched the matches on the outside courts. Richards won in straight sets from Brugnon. The score was 6-4, 6-1,

The Frenchman fought hard and

brilliantly. His service and driving were severe. Both players made many fine passing shots and well-placed

Richards continued his fast pace in the second set, placing with acturacy, while his opponent began to away in the hands of the Princeto The American won the last set by

taking the final four games with a terrific burst of speed, during which he lost only four points. His service vas so fast that Brugnon could make only weak returns and occasionally was aced. Richards continued his net play in this set, making several points with well-placed volleys. The Frenchman was fast, but was smothered by the pace set by his opponent.

Mile. Suzanne Lenglen continued her triumphant progress in the women's singles by defeating Mrs. B. C. Covell of England, 6-0, 6-3. Mile. Lenglen was playing at top speed, jumping for high ones and making shoestring

rica, defeated Wheatley, England's youngest Davis Cup player, 3-6, 8-6,

6-1, 6-2. Miss Martha Bayard of New Jersey was eliminated from the women's sin-gles by Miss E. R. Clarke of England, 6-3, 6-4.

Out 4 3 4 4 5 39 74 Out 4 3 4 6 2 4 5 4 36 In 5 3 5 3 4 4 4 6 -38 74 -148 3, 6-4.
Miss Leslie Bancroft of Boston de-

feated Mrs. Parton of England, 9—7, young Sioux City golfer who made 6—0. Mrs. Parton's steadiness ensuch a fine showing in the United 6—0. Mrs. Parton's steadiness en-abled her to give the American girl a close battle in the first set, during brockline, Mass., last year, finished which the latter was somewhat un-steady. Miss Bancroft recovered her steady. Miss Bancroft recovered her form in the second set, however, and did not allow her opponent a single turned in by J. C. Ward of Williams

inated from the women's singles by work, finishing the second 18 holes Mrs. Shepherd-Barron of England, with a 78.

the softer tussle between Mrs. Mal-lory and Mrs. Edgington was a rather for the first 36 holes on Tuesday, was tame spectacle, and the King and

woman, eliminated Miss P. Holcroft from the women's singles

In the mixed doubles Miss Elizabeth Ryan, former Californian, paired with Randolph Lycett, defeated E. G. Bisseker and Mrs. Hazel, 7-5, 6-4. Johnston defeated P. D. B. Spence, Scottish champion, in straight sets, at

6-1, 6-0, 6-4. Miss Eleanor Goss, American, advanced in the women's singles by defeating Miss B. W. Donaldson of Eng-

There were no surprises yesterday afternoon, and only one thrill; this was when Mile. Suzanne Lenglen appeared in the stadium, which was crowded almost to capacity, to start after her fifth successive world's title. began in characteristic manner winning every game of the two-set match from young Miss Peggy Ingram, the daughter of one of England's

former international players. Mile. Lenglen played superbly, keeping her opponent at the base line and snuffing out whatever hope the little English girl had by playing shots of amazing accuracy within a few inches of the side and back-court lines. Occa-

sionally she worked up to the net to finish off a rally with a net cut-volley. When she had finished, many of the spectators went to the outside courts to look over the other candidates for the woman's championship; there was none, however, whose play seemed even to approach Mile. Lenglen's in vigor, accuracy or strategic sound-

It was hoped to reduce the survivors in the men's singles to 32 by last night, but more rain fell, delaying play in the afternoon.

*Withdrew. †Seven tied for six places.

Princeton captured the team chamcompetition with a total of 1286. Yale University, which finished the first day's competition in third place, was second with 1298, while Harvard, which led at the end of the first day's play, finished third with 1315. The four Princeton men played very consistent golf as there was a difference of only 18 strokes between the lowest and the highest. Yale owes second place largely to the work of Cum-mings, who played the 72 holes in an even 300, which was 40 strokes better than the card turned in by the fourth Yale man and 20 better than the second Eli. The scores in the team championship fellow:

Pick of East and West Will Bat-

tle in the Premier Test of

American College Rowing

POUGHKEEPSIE, N. Y., June 28 (47)

Under the les of the picturesque highlands of the Hudson River, six

eight-oared varsity shells, the pick of

the east and west, will battle for

supremacy today in the premier test

Stalwart midshipmen of the United States Naval Academy, champions for

the past two years and favorites again

this year, will match their rowing

skill against a sturdy band from the

Pacific coast, representing the University of Washington, and four other

eastern rivals—Cornell, Syracuse, Co-lumbia and Pennsylvania—in the three-mile race that will conclude the

three-mile race that will conclude the twenty-sixth annual regatta of the Intercollegiate Rowing Association.

Though lacking the experience of their predecessors, who swept to victory on the Hudson in 1921 and 1922, setting a new course record last year, the middy oarsmen are ranked by experts as equally as powerful. Their chief opposition, critics believe, will be furnished by Columbia, Syracuse and Washington, with Pennsylvania and Corneil conceded but an outsde chance.

sity title, sought also by Cornell and Pennsylvania, while Washington's rangy freshman eight was picked to

fight it out for yearling honors with Cornell. Columbia, Pennsylvania and Syracuse are the only other freshman

Poughkeepsie was in gala array to-

day, and the early arrival of thou-sands of rowing followers, by train, automobile and boat, promised one of

the most colorful of regatta scenes. Cloudy weather, with moderate tem-

peratures, gave some hint of rain, but river men prophesied ideal conditions for the races, the first of which, for junior varsities, will start at 4:15 o'clock, daylight-saving time. The freshman race is scheduled for 5

o'clock, and the varsity event for o'clock.

The Monitor's Appeal to Educators

DUCATORS everywhere are interested in because the Monitor is making an appeal to anyone who is a student of the world's activities, viewed in their broadest light.

Extended reports of the National Education Association Convention and World Conference on Education at the Oakland-San Francisco meeting will appear each day. Our regular staff correspondent, assisted by two special writers, will cover the occasion fully.

The progressive steps taken by the N. E. A. at Boston in 1922 and at Cleveland in 1923 make this meeting of marked interest to school teachers and superintendents. Problems of importance to every American citizen will be discussed and acted upon.

GIANTS' PITCHERS CAUSING CONCERN

McGraw Is by No Means Sure of Repeating, With His Staff Below Par

In answer to the many critics of baseball who claim that the New York National League Club is practically unbeatable, with its present personnel intact, John J. McGraw, manager of the world's champions, has this to

"The Glants are in the game every day because they realize that they have to be. It is not a one-sided race, as many people believe, but a hard battle, with three clubs or even four having a chance to come out in front. With pitching, such as we have been with pitching, such as we have been receiving the past month, and no prospect of getting much better pitching for a while anyway, we shall be fortunate to hold our lead over Pittsburgh and Cincinnati. If any of the boys had overconfidence, it was dispelled when the Giants lost six in a row out west; in a way, those defeats were a good thing, for without them it might have been hard to convince some of the players that they were liable to be defeated in the long run. That does not mean that the Giants are a swaggering team, but almost any crowd of players is apt to get a little overconfident. I believe, after two world's

championship victories. "Just after that setback in Pittsburgh and Cincinnati, we dropped a game to St. Louis, then proceeded to take the best the Cardinals had to offer and sent out better still. We won the last three games at St. Louis and have had it pretty easy ever since with Phila-delphia and Boston, although the Braves put up a better battle yester-

day than I expected. did not want to work Hugh Mc-Quillan yesterday out of his turn, but I did want to win that game. That is the way it is getting to be every other day, one pitcher fails and I have to call upon another whom I had planned to save for another day or maybe longer. That state of affairs cannot last very long if a team is going to

win the championship.
"I am sure of my pitchers, however They have slumps now and then, of greater length than I would wish, but all that is part of baseball. With a little time against the weaker teams like those we have been playing lately, I think the whole staff will show a

sudden improvement McGraw says that he is pleased with the showing of James O'Connell, the center fielder from the coast, for whom the New York club was reported to have given a large sum. The Giants' manager, always a firm proponent of the "shifting outfield," is using O'Connell alternately with W. A. Cunningham in the present series, with C. D. Stengel in the background as an admirable reserve. McGraw likes to employ young talent as far as possible, hence his inclination to give O'Connell and Cunningham the fullest chance. At third base the recruit Travis Jackson is playing in a fashion not far excelled by even the regular incumbent, Henry K. Groh.

SOCCER TO INVADE N. Y. BALL PARK

Paterson F. C. Will Be Home Club at Polo Grounds

NEW YORK, June 28-That professional soccer football is to hold sway ship season of 1923 is over, was assured last night when officials of the National Exhibition Company, owners of the New York Giants, and Secretary T. W. Cahill of the United States Football Association, the body governing the soccer game in this country, of Oxford University, will play Bettens concluded negotiations which have been reported to have been under way

Two Harvard teams, G. C. Guild and been reported to have been under way many months and which are calculated eventually to establish league soccer in all major league baseball parks from the close of each season

to the start of the next Followers of this popular fall-tospring sport are hoping that the New York American League management will follow the lead taken by the Giants and give the New York Soccer Club, which has had the New York Oval for its home field, permission to use the Yankee Stadium, and that the Brooklyn National League Ball Park will become the home stand of the Brooklyn Wanderers, who have been

campaigning on Hawthorne Field.
Paterson Football Club, 1922-23 national soccer champions, will be the home club at the Polo Grounds, where the soccer game has not been played since the tour of the famous Pilgrims

of England in 1905. President C. A. Stoneham of the Giants last fall sought to introduce soccer at the Polo Grounds, but no franchise in the eastern professional eague was available to him and insufficient time remained for him to develop a team independently, for the season was then getting under way. New York Soccer Club, with its own park across the Harlem River, and protected by territorial invasion re-strictions of a clause in the league rules, declined to sell out to the Giants' owners. The territorial protection clause has since then been altered, over the New York Socce Club's protest, to permit the transfer of the franchise held by the national title-holding Paterson club to New York City.

BUTLER RISES TO TOP ATHLETICALLY

Three Seasons of Competition

INDIANAPOLIS, Ind., June 28 (Special)-Butler University of Indianapolis is rapidly attaining a similar proninence in Indiana college athletics to directorship of H. O. Page, former University of Chicago athlete and coach, Butler athletically has risen in "doormat posithree years from the tion" in Hoosierdom to the top.

The athletic year just closed has been the best yet for Butler. The Blue and White was runner-up to Notre Dame for the state football title, runner-Minneapolis, in the morning round and up to Franklin for the state basketball title, state baseball champion state college, track champion, and state tennis champion. Two varsity football men and the tennis captain are the only athletes who will be lost this year by graduation, so the future is as promising as the past.

football last fall Butler defeated in order: Wilmington, Franklin, University of Illinois, Earlham, Wabash, Ross Polytechnic and DePauw. Butler lost the state title game to Notre Dame and was defeated in its tenth game in 10 successive weeks by Bethany at Wheeling, W. Va. The victory over Illinois preceded the Illinoi Iowa game, when Iowa was held to its lowest score, 8 to 7.

In basketball, the same Butler team which defeated Yale, Chicago, Purdue and other fives in 1922, defeated Car negie Tech, Illinois, Chicago, Wisconsin, Purdue, Wabash and DePauw, and lost only to Franklin, undefeated state Baltimore

champion.

In baseball Butler has defeated this spring Chicago, Indiana, Purdue, Ohio State, Wabash, DePauw, Franklin, Earlham, Rose Poly, Hanover and Indiana State Normal. Butler has lost this spring to Illinois, Wisconsin and St. Viators. Two post-season games at Centre, Ky., remain on the 1923 baseball schedule.

The Butler relay team captured collegiate honors at the Kansas games at Drake and in the Indiana collegiate and Indiana Conference meets, setting new records in the last two and at Drake bettering the collegiate time made at Pennsylvania. The Butler track and field team, though composed of only 13 men, decisively defeated Franklin and Wabash in dual meets won the state collegiate title, and finished a close third in the state conference meet to Notre Dame and Wabash.

Los Angeles 8, Sacramento 0. Sait Lake 5, San Francisco 4. Portland 7, Oakland 6. Seattle 3, Vernon 2. The Butler tennis team lost only four

PLAYERS REMAIN sets in 55 played, and won every match and the state title with ease. In every major sport Butler ranked higher in state honors than indians and Purdue, the two Hoosier members

Westerners Eliminated From Intercollegiate Tennis Singles—
British Pair Left in Doubles

PHILADELPHIA, June 28—Four eastern college tennis players, sole survivora of 54 contests, will play this afternoon in the semifinal round on the National Intercollegiate championship tournament at the Merion Cricket Club, for the right to enter the final round Saturday.

The last of the California players, J. M. Davies, of Leland Stanford, and P. A. Bettens, University of California, were eliminated in the fourth round yesterday, and the title is now sure to remain in the east. Jerome Lang, of Columbia University, New York State's college title holder, was also forced out of the tournament yesterday as a so forced out of the tournament yesterday as a so forced out of the tournament yesterday as so Butler is well fortified to oppose Japanes baseball strategy.

HE Pittsburgh club of the N THE Pittsburgh club of the National League has played its last game of the season at St. Louis, and Cardinal fans are probably glad of it, for nary a game did Branch Rickey's team capture out of the series of four that has just come to an end. It is rather early for a club to have finished its quota of contests at any city, but such are the vagaries of a baseball schedule.

Bernie Neis and J. H. Johnston did some great batting for the Brooklyn Superbas in their game with Philadel-phia. Neis, the lead-off man, made two two-base hits, a single and a home run, while Johnston, who bats second, drove-out a two-base hit, three-base hit and home run. Together they accounted for 18 of Brooklyn's 35 total bases.

Morris Berg played in that Brooklyn-Philadelphia game and, like all the rest of the team except Bert Griffith and W. H. Ruether, the former Princeton varsity star hit the ball safely. He singled once in two official times at bat. In the field, playing his accustomed position of shortstop, Berg handled three putouts and two assists.

putouts and two assists.

The Boston Nationals figured in an The Boston Nationals figured in an amusing run-up play in the eleventh inning of their battle with New York. It came after Ross Young's home run had broken the tie. G. L. Kelly was on third base and W. A. Cunningham on second when H. A. McQuillan hit to R. E. Smith, the shortstop, whose throw home caused Kelly to turn back to third. Twice the Braves held the ball for some reason, when a short toss to third base would have retired the runner going. reason, when a short toss to third base would have retired the runner going back; and/as Kelly was entitled to that base, Cunningham had to run back to second, which he succeeded in doing, aided by a wild throw. This filled the bases, and an infield out, another wild throw and a couple of more hits throw and a couple of more hits brought the Giants' score for the inning

Singularly, both the New York and Brooklyn Nationals made 21 hits and 15 runs in their games of yesterday. Five of the Glants' hits and seven of their runs, hewever, came in the eleventh inning. Brooklyn made 13 of its run in the first four innings at Philadel-

tional League a decade ago, has re-tired from baseball to all intents and purposes, having been given his un-conditional release by the Charlotte Club of the South Atlantic League. It looks like J. L. Bush against E. A. Rommel as the Yankees and Athletics line up at the Bronx Stadium this after-

noon. Both pitchers have been work-ing well lately and the opening game of this much-heralded series will un-doubtedly be hard fought.

The meeting of Brooklyn and the Boston Braves scheduled for last Tuesday, but called off on account of rain, has been put over to July 22, when the teams will play a double-header.

OHIO MEN TO COACH

COLUMBUS, O., June 28—Four Ohio State athletes, members of the recent graduating class, will coach college and high school teams next fall. The quartet is C. N. Workman, H. H. Blair L. S. Moorehead, and N. G. Pollman Workman will become director of athletics and football coach at Simpson College; Blair is slated to become coach at Akron Central High School; Moorhead is to coach high school teams at Wauseon, O., and Pollman will become a high school coach.

VETERANS PROTEST **BUREAU METHODS**

National Disabled Soldiers' League Meets in Boston

In protest against alleged intimidation and coercion of disabled veterans by the United States Veteran's Bureau, the more than 800 delegates from 36 states and foreign posts to the third annual convention of the National Disabled Soldiers League held a mass meeting this morning in the Arlington Theater and listened to an arraignment of the administration of the federal bureau.

Today's meeting was held as a result of a resolution passed at the opening session yesterday condemning the bureau for refusing permission to trainees to attend the convention John T. Nolan, national commander of the league, told the delegates that bureau officials are trying to prevent the veterans in their care from having free discussion of policy. He asserted that the officials have sedulously avoided attending the conventions of disabled men, and declared that the bureau has served to provide political positions.

Mrs. Evelyn Lund, secretary of the National Forward to the Land League. yesterday outlined to the veterans a plan for farm and home building as a solution of their problems of employment and livelihood. The convention also heard from Charles A. York. that the national military home in Marion, Ind., is in abominable condition. Attorneys appointed guardians of shell-shocked veterans are abusing this responsibility, he asserted, and the function should be transferred to some other authority, even to the Veterans' Bureau.

HUGE BEACON AT KELLY FIELD SAN ANTONIO, Tex., June 20 (Special Correspondence)—A movable searchlight of 500,000 candle power, mounted on a motor truck, has been put in operation at Kelly Field for the guidance of aviators flying at night.

The World's Great Capitals

The Week in Rome_

ELALEDDIN ARIF BEY, Anof Spain is personally taking a keen
interest in the matter, and is using all
his influence to induce the Italian Govgora, having completed his diplomatic trian former Empress. mission last night, paid a farewell visit to Benito Mussolini, the Premier, presenting the latter with a complete rich collection of Turkish stamps for a state theater in Rome. The necesthe Italian King. Fuad Bey succeeds sity for such an institution in Italy Gelaleddin in Rome. 4. 4

of Public Instruction, Senator Gio- have proved unsuccessful, as the vanni Gentile, has formally asked to state has always refused to grant a join the Fascist Party has caused con- subsidy for its maintenance. The siderable surprise in Rome. Signor Teatro degli Italiani, which was Gentile, who is an eminent philosopher, joined the Mussolini Ministry in October. In a letter he sent to the Fascist Premier he says: "Although failure if the state had not intervened in the says of Fascist Premier he says: "Attnough being a Liberal with profound convictions I have become convinced that the only true Liberalism today is represented by your principles, which recall those of the glorious days of our Risorgimento." He further countries although in graver financial difficulties than Italy managed to stated that it was no use posing as a difficulties than Italy managed to Liberal, and in the mere defense of maintain a state theater. The Prethe old Liberal aims, to attack and was able to regenerate the country."

Was able to regenerate the country."

The was so certain that Signor Muster Teatro degli Italiani, which will solini represented real Liberalism that he felt justified in abandoning Liberalism to join Fascismo. Although Signor Gentile's letter has been favorably commented upon by all the Fascisti it has not failed to arouse indignation among the Liberals, who in a statement to the press declare that Signor Gentile has never been a member of the Liberal Party, and therefore had not the right to attack policy of a party to which he did not belong.

·A curious ceremony took place recently at the town hall in Milan, when 10 women, in characteristic event and has naturally aroused much Italian costume, presented themselves speculation in political quarters. in order to receive money prizes which are annually conferred on domestic servants who can prove the longest service in one place and with the same family. A legacy for the grant of these rewards had been left some 50 years ago by a Milanese citizen, Francesco Predabissi, who obviously must have known by experience the worth of a faithful servant. Each of the women had lived in the same place for not less than 40 years, while in the service of one family for 65 No better testimony can be given to her services than by quoting what her employer said of her: owe to her our domestic peace for over half a century.'

The Princes Felix and Francis, brothers of former Empress Zita of Austria, have arrived in Rome intrusted with a special mission from their sister who wishes to settle permanently in Italy. The Italian Government seems to be willing to grant the request on the expressed condition that the former Empress should aban-don entirely all political activity tending to the restoration of the Hapsburg castles in Italy which were all confiscated during the war as enemy property. Among them are the Villa delle

Rome, June 28 | known as the "Fiorentino." The King who will shortly return to An- ernment to offer a home to the Aus-

+ + + The Italian Government has finally given its support to the formation of sity for such an institution in Italy has been felt for a long time, and all The announcement that the Minister attempts to secure a national theater mier in receiving a deputation of "the only government that Italian dramatic artists formally be reorganized. An annual sum is to be given to the theater, and the Government will have a representative on its administrative council, of which Senator Corradini will be chairman Signora Duse has been asked to join the company of the state theater.
King Fuad of Egypt, who, as is re-

ported, will shortly make a journey to Europe, has purchased a small palace on the outskirts of Rome, costing The palace is now being furnished in the Oriental style, and will probably serve as a vacation residence for the Egyptian King. The acquisition of a palace in Italy by a

The largest Italian shipping company, the Navigazione Generale Italiana, at its last general meeting of shareholders proposed the doubling of its capital, which today amounts to 150,000,000 lire. It also proposed the construction of two large liners in the Trieste shipyard, designed for service between Italian and North American ports. The other chief Italian shipyards are busy. The Italian Premier has informed the Mayor of Ancona that the Government has allocated 6,000,000 lire for the improvement of the harbor of that town, and two new steamers will shortly be built in the Ancona shipyards. The armored cruiser Libia which has just returned from a voyage round the world will also be refitted there.

SYDNEY HAS HALL-MARK FIRM SYDNEY, New South Wales, May 24 Special Correspondence)-A hall-mark company has been formed in Sydney. Up to the present a jeweler has been able to stamp his products with any mark he chooses. Failing to get the monarchy. The former Empress pos-government interested in the matter, sessed several beautiful palaces and the Retail Jewelers' Association formed a company to trade without profit. Ultimately it is hoped the company will Planore, near Lucca; where the Empress spent her early years. A more suitable residence is that of Villa d'Este in Tivoli, which the Italian Government is willing to give in exchange for the famous and very precious jewel, pany will be destroyed, MICHIGAN

THE PAGE OF THE SEVEN ARTS

Statue to Theodore Thomas to Be Dedicated in Chicago

By FELIX BOROWSKI

LTHOUGH Chicago is one of the world, it has done but little to perpetuate in stone or marble the fame of the great musicians of the city. The latter offered a letter of introduction to the conductor and the fame of the great musicians of the great musici world. With a monument to Beethoven in Lincoln Park, dedicated in 1897, musical statuary in this city begins and see me while I am here. You

determined upon an addition to the list. Pedestrians who pass by the Art Institute, on Michigan Avenue, have lately observed to the south of that building a little scaffolding in process of erection, but—such is the circumspection of the authorities who recu spection of the authorities who regu-late the affairs of municipal sculpture -nothing was given out for some time as to the reason for the platforms.

sculpture at the Art Institute—has recently been completed, and, under the auspices of the Ferguson monument fund, is to be placed in position on Michigan Avenue, exactly opposite Orchestra Hall, which, until now, has been the sole and certainly an enduring monument to the conductor's memory.

Mr. Polásek's model was accepted today by the trustees of the Art Institute, who are the administrators of the Ferguson fund. It is to be cast immediately and may be completed late this fall or early next spring. Mr. Polásek has chosen a feminine figure with a harp, representing music. On granite eight feet high and 40 feet ong behind this symbol, Thomas and his orchestra will be memorialized in bas-relief, inscribed with Paderewski's words: "Scarcely any man in any land did so much for the musical world of the people as Theodore Thomas."

Ephemeral Fame

No more fitting time could be selected to cast a retrospective glance at the admirable work which Thomas accomplished in Chicago. It is one of its representatives are too soon forgotten. How many of the vast multitude of actors, singers, pianists, violinists and conductors who won fame in their own day are remembered in ours? The present generation is one which knows little of the man who, more than any other, was responsible for making Chicago the musical center it is today. Yet Thomas was a figure of the nineteenth century, whose achievements were in all men's

George P. Upton is responsible for the statement that Thomas' first connection with Chicago came about in 1854-Mrs. Thomas says 1855-when he played the fiddle in a small orches-tra that accompanied a little galaxy of artists—Ole Bull, Amalia Patti, Maurice Strakosch and Bertucca Maretzek-that was touring the country. He came again the following year and, in addition to performing in the orchestra, appeared as a soloist in Vieuxtemps' "Réverie." There was

An Artistic Idealist

Whatever may be said about Theo-dore Thomas' lack of the finer social graces, it is certain that no musician has carried in his heart a loftier artis-tic-idealism. He had become a concert violinist of brilliant reputation when, in 1862, he arrived at the conviction that the public needed an edu-cator to lead it to a higher taste in instrumental art. Thomas realized, too, that the orchestra was the medium through which he could accomplish the work upon which his heart was set. To do this, not only the public taste had to be raised, but the standard of orchestral performance had to be raised as well. The average conductor of the '60's, it must be rememwas the servant and not the master of his men. Theodore Thomas was not of that stamp. He made it clear that his rule was absolute, and there were occasions on which he resorted to physical demonstration to prove recalcitrant members of his orche tra that it was dangerous to take

Having established his orchestra in New York in 1864 Thomas brought it to Chicago five years later, when he began his practice of making tours in order to educate public taste in the principal cities of the land. The local press was filled with great rapture as

were engaged to play at Crosby Opera House, which U. H. Crosby, the pro-It is now announced that a statue of Theodore Thomas—the work of Albin Polasek, head of the department of was to have rededicated the building to the higher music Oct. 9, but the conductor and his men got no nearer their engagement than the Twenty-Second Street station of the Lake Shore Railroad. The great fire had broken out and scarcely a building in the city remained intact. "I became so involved financially by this disaster," Thomas wrote, "and by the con-sequent interruption of our tour, that it was many years before I recovered from my losses.'

Enterprise in Chicago was not less strenuous in the '70's than it is now, and rebuilding began so quickly and on so extensive a scale that Thomas was able to play again in the city the year following the fire. It is worth mentioning as an example of the conductor's combination of managerial sagacity and artistic idealism, that when he came with his orchestra to Chicago in March, 1873, he engaged both Anton Rubinstein and Henri Wieniawski and. having by that stroke of business insured a packed house, proceeded to demonstrate to the public what con-stituted a program of good music. It is worth while to set forth this scheme the tragedies of interpretative art that of art. Thomas' orchestra performed the representatives are too soon for carrier," the "Romeo and Juliet" symphony by Berlioz and the "Huldigungs Marsch" by Wagner, and Wieniawski performed his second violin concerto certo by Beethoven and the "Carna-

val" by Schumann. Summer Concerts

Theodore Thomas entered upon a more extensive connection with Chicago when he began in 1877 his series of summer concerts in the Exposition Building, which stood on Michigan Avenue opposite Adams Street. The building, which was two city blocks in length, was not an ideal place for music, but an air of informality was given to the entertainments by the installation of little tables, placed amid potted palms, at which food and drink could be consumed. The conductor did not believe that this made it incumbent upon him to perform poor music. Some of the most imanother visit in 1859, and after that portant works in the symphonic rep-Thomas did not see Chicago again in ertory, old and new, were offered to

establishing a Chicago Orchestra with Thomas as its director was first mooted, but various difficulties and complications prevented its fruition. C. Norman Fay, Thomas' brother-in-law, finally induced a number of guarantors—this was in 1890—to pro-vide the money for the orchestra, and Thomas, who had been existing for some time in a condition of artistic discontent, consented to leave New York and take up his abode by Lake Michigan as the director of the organization which had been founded by the Orchestra Association. The first concert was given Oct. 17, 1892, in the Auditorium. Thomas' duties and re-sponsibilities were considerably in-creased when, in his second Chicago season, the World's Columbian Expo-sition enlisted his services as musical bered, was a poor creature who toad-ied to the virtuosi and who too often director. The conductor had unfortunate experiences with the music of this enterprise. There were envy, hatred, malice and much uncharitableness; bickerings over official pianos

'isms" are represented.

There is a bewildering mass of new-There is a bewildering mass of newness in these four large rooms, though this art may not be so new to us as our guests may have imagined. Cubism, futurism, expressionism, suprematism, even, have come over to Holland, as well as to the rest of the world, from that international center which is called Paris. What the Russians want to demionstrate is that there is a determinate action behind modernism: that the Revolution has

there is a determinate action behind modernism; that the Revolution has not killed art, but that, on the contrary, their artists, all the time of Russia's exclusion, have been working hard at the foundations of what they consider to be the art of the future. From this viewpoint we have to judge works which at first sight appear to be the products either of the nursery or of the wilderness. The makers, however, do not say this is art, but that this is only the first stone of the building. In western Europe in the seventeenth century every art was a handicraft and every every art was a handicraft and every handleraft was an art. In this sense, though in a somewhat different manner, art and technique will, according to these artists, again be one in the

It is significant that the Moscov Academy bears the name of "Academy of Art and Technique." According to the painter Sterenberg the latest popular festivals in Russia have shown that decorative art especially shown that decorative art especially has made enormous progress. Unfortunately we are not able to verify this statement in the present exhibition as there are neither prints nor maquettes of pageants, triumphal arches and similar decorative objects.

Most of the exhibits, among which are interesting committee. are interesting ceramics, suggest, however, that Russian art, though marked by a certain solidness, if not roughness, which is rather strange to western taste, can boast of able and in some ways promising colorists. Remarkable are the endeavors to find combination of the rhythm of vement with the rhythm of decora--or to make lines

South Shore Country Club,

Chicago, Has Annual Show Special from Monitor Bureau

CHICAGO, June 21—The South thore Country Club, believing that it is adding to its summer attractions by announcing a midsummer exhibition of a loan collection, makes use of the same opportunity to introduce the second important painting, "A Classic—Mason's Island," by Henry W. Ranger, when he offers the "Earthquake," an American play, written by Theodore A. Liebler Jr.

Philip Goodman has engaged Luella Gear for his production of "Poppy," a musical comedy in which Madge Kennedy will star.

How he was a stamford, Conn., "Mason's Island," by Henry W. Ranger, which it has just purchased to add to its permanent gallery. Its first purchase, "The Storm Spirit, Grand Canyon," by Elliott Daingerfield, was him gat the South Shore Country Club in December, 1923, at the midwinter festivities.

"A Classic-Mason's Island," by July and August.

Mason's Island and with the picture has come a testimonial with an account of its painting and his acquaintance with Ranger.

"A Classic—Mason's Island" represents a favorite type of composition. The oaks and forest trees weave their branches in the hackground, the azure skies visible beyond. The forest is carpeted with richly hued vegetation, and a pool reflects the surroundings. It is possible that the title, "A Classic," was suggested by the scholar who felt the rare balance and completeness of the design in composition.

who left the rare balance and com-pleteness of the design in composition. While announcing the purchase of the landscape by Ranger, which hangs on a wall beside "The Storm Spirit—the Grand Cafion," by Dain-gerfield, the members of the South Shore Country Club are invited to view a loan collection of 40 canvases chiefly from the homes of their asso-ciates, who have not exhibited previously. In this way the Art Commit-tee promotes the interests of painting in more ways than one. A high stand-ard of taste lifts that of the younger viewers, acquaints them with con-temporary painters and some of the past, and the possessions of the con-noisseurs of the membership.

Among the 40 works are canvases by foreign painters, the Barbizon men and the Dutch, who were famous in their day, and a few canvases by artists comparatively unknown, which prove the fact that not all good paint ers are advertised in dealers' cata-logues, but that exceptional works of retiring artists go to buyers who cherish them in their homes.

Annual Toledo Exhibit

TOLEDO, O. (Special Correspond-nce)—The Toledo Museum of Art has opened its twelfth annual exhibition of contemporary American paintings. On account of the lack of space available for temporary exhibitions, due to the rapid growth of the museum's permanent collections, only 44 artists could be invited to exhibit. These, however, stand for the highest quality and show the greatest devel-

opment of present-day American art.
The artists represented are Wayman Adams, Tom P. Barnett, George Bel-lows, Max Bohm, Jessie Arms Botke, Dines Carlsen, Hugh Breckenridge, Eliot Clark, John F. Folinsbee, Daniel Garber, William Greason, John Johansen, George Luks, Mary T. Mason, Charles Reiffel, F. Luis Mora, Gardner Symons, Elmer Schofield, Frederick J. Waugh, Katherine L. Adams, Gerald Frank, Myron Barlow, Hilda Belcher, Lester D. Boronda, Ross E. Braught, John F. Carlson, Gertrude Fiske, J. Jeffry Grant, Kathryn E. Cherry, Charles H. Poetic Rovers and Vagabonds

deep-sunk in the bedrock of human nature, our love of the wilderness is a modern feeling quite unknown to the ancients. Homer's Ulysses, that hapless waif of the Mediterranean, was driven from land to land by dire necessity and was never content until what they had begun for learning the students of Europe.

These "scholar-gypsies" of the Middle Ages wandered from town to town at first from necessity, but very soon such a charming necessity must have changed into pure delight, so that what they had begun for learning the students of Europe. Homeric original reveals a most sig-Homer has fought his way back from Troy through moving incidents by field and flood with such deep devotion to home that we cannot think of him leaving voluntarily the fireside to which he at last attains. Tennyson's Ulysses has no sooner completed his adventure of twenty years than he be

For all experience is an arch where through Gleams that untravelled world whose

margin fades Forever and forever when I move. How dull it is to pause—to make

In these moving words to which every modern heart thrills back an echo we have the very antithesis of anything the Ulysses of antiquity could have felt. They are the words of a modern rover and vagabond. + +

The love of wandering is first clearly seen, apparently, in the young scholars of the Middle Ages who tramped the roads of Europe in search manuscripts. In the days before the printing press, when books were issued in editions of a single copy, the learned man, or at least the man who had read widely, was necessarily a man widely traveled. The life of such a scholar corresponded closely to that of the ordinary handicraftsman. He spent his prentice years listening to the lectures of some master who had been up and down in the world reading many books-lectures which were often little more than abstracts from those books were otherwise inaccessible to his listeners. Then came his own journevman period, during which he also wandered abroad, from the libraries of Ireland to those of Sicily, reading his way through Europe and taking voluminous notes from which he read to his own pupils when he in turn set up as master.

In this way the roads of the western world were filled for two or three centuries with wandering scholars, who although they had serious business to transact at the several ends of their known world, were perhaps in no greater haste than the young students of today to perform it, and who were perhaps wise enough to know that it "better to have traveled than to Thus were formed the fraternities of the road, students' guilds, and an esprit de corps which

"First the blade, then the ear, then the full grain in the ear"

BOSTON, THURSDAY, JUNE 28, 1923

EDITORIALS

THE president of the American Medical Association, addressing that body at San Francisco, the other day,

"Experimenting" on the States cast an illuminating light upon the real significance of the demands made upon every legislature for the further intrenchment of the medical profession in political power. Every time the lawmaking body of a state meets it is called upon to con-

sider proposed legislation, giving to doctors, irrespective of their individual professional qualifications, more and more power over the lives and liberties of citizens. The states are asked to decree that parents shall be forced to submit their children to degrading examinations and frequently injurious "tests" prior to their admission to the public schools. It is sought to make vaccination universally compulsory. Schemes for industrial insurance, coupled with compulsory examination of those insured, by doctors, for a fee, are strenuously urged. Always the advocacy of such propositions is accompanied by their medical champions with the assertion of infallible knowledge of the questions involved, and a scornful denial of the right of anyone not possessing a medical degree to speak even with intelligence on the subject.

It may be said for Dr. Wilbur, the president both of Stanford University and of the American Medical Association, that he was at least frank in admitting that most of these panaceas urged so earnestly by the political doctors are yet of doubtful value. Still, he takes the view, apparently, that the various states in the Union are very much in the position of guinea pigs and rabbits, as being fit subjects for experimentation and vivisection. He would not go as far as some of his colleagues would in the way of national social health legislation, any more than most vivisectors would try their methods of inquiry upon a human being. A blunder in a state or two would be less serious than a blunder committed in national legislation, and so he says, "Fortunately there are 48 states in the Union, so that experiments can be tried out in them without too much risk. When a good plan is discovered it can be repeated by other states. Not until we are sure of our ground is national social health regula-

Dr. Wilbur's conclusion will be applauded by many who question some of the steps by which he has reached that conclusion. It seems to put the seal of his official displeasure upon a question which the National Education Association, at San Francisco, will have to meet again as it has met it before, namely, the establishment of a department of public health, of which the department of education shall be a part—and a lesser part, at that. The National Education Association has frowned on this proposition heretofore, and it doubtless will do so this week, but its disapproval will probably be materially strengthened by the admission of the president of the medical association which has most strongly urged the creation of such a department, that national social health legislation as yet is unadvisable.

Just what effect the admission of this distinguished leader of the medical profession, that the propositions so strenuously urged on the state legislatures are largely experimental, may have in the future campaigns for special medical privileges in the states remains to be seen. It seems probable that it will be effectively cited more than once in future when Schick tests, periodical physical examinations of school children, and compulsory vaccination are pressed upon the state lawmaking bodies, as if they possessed demonstrated and established value.

THERE has been no concealment of the fact, ever since the present tour of President Harding to Alaska was

Shaping an Alaskan Policy resident Harding to Alaska was decided upon, that it was the desire of the Chief Executive, as a result of his investigation of conditions there, to formulate and make effective governmental policies advantageous both to the people and industries of the

Territory and the people of the United States as a whole. As has been tersely said, it is the hope of the President that he may "sell" Alaska to the people at home. Otherwise, that he may, as a result of the publicity given his visit there, convince the people of America, and of the world, for that matter, of the importance and wealth of Alaska's natural resources and of the great promise which the development of those resources gives.

But it is also possible that the President hopes at the same time and by the same processes to "sell" the United States to Alaska. There has been manifested in recent years, though formerly to a greater degree than at present, a growing suspicion or dissatisfaction in Alaska, especially among politicians, regarding existing governmental policies as they affect the Territory and as they are administered from Washington. As a result of this agitation, it has been insisted that there be less interference in administering territorial affairs, and that greater power and authority be given those within the Territory to direct its government and development.

Forecasts indicate, if they can be accepted as plausible or authentic, a desire on the part of the President to assure the continued linking of Alaskan administrative affairs with the governmental bureaux in Washington, but with a much more intimate touch and a greater knowledge of affairs on the part of those responsible for the success of the policy adopted. No doubt it will be many years, at the present rate of growth in population in Alaska, before there is less federal direction in the conduct of the Territory's affairs. The enormous areas awaiting development, the sparseness of population, and the great value of natural resources, make the task ahead one not to be lightly or carelessly regarded. Those in Alaska who have resented what they have regarded as

misdirected bureaucratic interference will not be inclined to refuse that helpful co-operation which is contemplated by the tentative plan under consideration.

It is doubtful, judging from past accomplishments, if a proper measure of development could be carried on, while safeguarding and protecting the public's rights in undeveloped resources, such as timber, and mineral, and mineral oil deposits, were the Washington Government to leave the territorial authorities to proceed on their own initiative, unaided. It is more than a one-man job, and it is gratifying that serious thought is being given to a plan which contemplates more thorough co-operation, rather than one which would lessen the interest of the people of the United States proper in the welfare of the vast territorial empire of the north.

THOUGH a relatively small state, Belgium has for a long time held an important place in the affairs of Europe,

politically as well as geographically. It has been called the "cockpit of the continent." This predominating position it still holds. I Just as in 1914 it was Belgium's sacrifice that fused the Franco-British entente into a war-time alliance, so today it

The Position of Belgium

is Belgium that diplomatically serves as the most elastic link between the two countries. While the Germans base their hopes on a complete split, the Belgians are always busy patching up differences. If France and England should once more unite in their reparation policies, Belgium will have thrown the first bridge across the gap.

"Like France," writes Henri Jaspar, Foreign Minister in the recent Theunis Cabinet, in the Europe Nouvelle, "Belgium needs reparations; like England, it must restore its trade: like both, it thirsts for security."

Being dependent for its restoration on reparation payments, Belgium is with France in the Ruhr, but its Govfernment has insisted on declaring that its stay depends, not on military strategy, with a view to changes in frontiers, but solely on payment of reparations. It has never consented to go the whole length advocated by some of M. Poincaré's advisers. With England, it has never lost touch. On French policy, it has had a moderating influence. Being no longer a ward of other nations, with a "guaranteed" neutrality, it will henceforth take an active part in all international affairs. Though not a big power, it has always been represented on the Council of the League of Nations. With France it concluded a military alliance in 1920. This spring it has passed with the same country a commercial treaty providing for French tariff concessions. With England its relations are not vet so clearly defined, but a military convention of some sort is inevitable, and when that is framed it may well serve as a further, and perhaps a permanent, point of contact between France and England. Each of these countries will be affected by the obligations assumed by Belgium toward the other.

This international position of Belgium throws into special prominence its domestic politics. The present Cabinet crisis, though due solely to internal quarrels, has retarded the entire reparations negotiation. Unfortunately the Belgian political structure is divided, not only vertically into three parties, the Roman Catholic, the Liberal, and the Socialist, but also horizontally into two racial units, the Walloons and the Flemings. On the language question each party is divided against itself, though in different proportions. The Liberals are mostly French-speaking. The test question is the "flamandization" of the University of Ghent. Last fall the Flemings won in the Chamber of Representatives. This spring they were defeated in the Senate. Whichever way the upper house had voted, a Cabinet crisis was expected. Had the Flemings again carried the day, the Liberal ministers in the coalition Government would have resigned.

In the long run, the Flemings are pretty sure to get their way. Already they outnumber the Walloons by 500,000, and like the other Germanic races, they are more prolific than the French-speaking Walloons. At present they have no university of their own, while French is used in four. Though, during the invasion, the Germans made themselves the protectors of the Flemish movement, it is not fair to say that the Flemings are pro-German. Von Bissing aimed at splitting Belgium in halves, but failed. With the English, the Flemings, who inhabit the seacoast and roughly the northern half of the country, have racial traits in common, and as they gain in power, the present ascendancy of France at Brussels is likely to diminish, which explains the attitude of the French press. But more than ever, Belgium will be a medium of international reconciliation.

LORD CURZON'S demand of Russia that it end its propaganda in India and the Near East is amply justified by

Soviet Attempts in India past fact, even if not too promising of future result. How much of that "unaccounted for" \$13,-750,000 for propaganda purposes was spent in Britain's great protectorate? A considerable sum, surely; for Moscow has been at work in that Asian

peninsula for at least four years, doing what it could, albeit far less than it would like. The Intelligence Service has been a real check upon its zeal, though no setback has been a final discouragement, since the Soviet authorities, cheated in their hopes of a general European uprising, dream now of an Oriental revolution, with India

sir John Hewett, lately Governor of the United Provinces, says that Bolshevism is a force to be reckoned with from the Himalayas to Cape Camorin. The bitterly anti-British Vanguard of Indian Independence circulates widely, and the native press seems eager to copy its articles, bristling with all the familiar Communist terminology. The recent arrest, at Madras, of Nilakantan was another straw showing how this ill-wind is blowing. He styles himself "Chief of General Staff," and

certainly he tried to be general purveyor of Soviet tracts, calling for an aggressively militant program. His preachment ran that British imperialism would never change and that India's upper class would never risk its comfort for "genuine freedom," therefore the immediate task must be "to involve those elements whose welfare hangs upon a realization of Nationalism."

"M. N. Roy" would seem to be the ringleader of such as these. The gentleman's real name, by official report, is Narendra Bhattacharji. We are told he fled from California in 1917, to avoid arrest, after bringing there from Mexico the Bolshevist activities he had earlier carried on south of the Rio Grande and (before that) in Java. Today he is a resident of Berlin, with Moscow and l'ashkent for occasional change. His slogan is "A Federated Republic of India," with peasantry and laborers everywhere organized into Soviets. Of course, there is to be completest independence, freedom from whatever outside supervision, abolition of the landlord system, confiscation of great estates (without compensation), and nationalization of all public utilities. Other details of the nice little scheme include workers' councils, the eight-hour day, free compulsory education, and a national militia

Whether or no the Soviet chiefs will do as the British Government now demands, remains to be seen. Once before they promised (even as today) to set a period to propaganda—and went merrily forward, just the same, arousing all the discontent possible. It is well for the London authorities to do all that may be done to dam at its source this muddy stream of trouble-making, but one may rest assured that nothing will be taken for granted, no matter what pledge is made, nor how solemnly.

It is very clear that the question of the limitation of the construction of military aircraft is about to become

An Opportu-

nity to

Advance Peace

an immediate and a vital international question. The Monitor has already commented upon the steps taken by Great Britain to meet the menacing aircraft program adopted by France. Dispatches from Paris indicate a willingness on the part of the

willingness on the part of the
French to stop construction if the fleets are left at their
present proportions.' This would leave France with
approximately twice the air force possessed by Great
Britain. French advocates defend this position by pointing out that Great Britain has twice the sea force that
France possesses. It is obvious that at the present
moment there does not exist a common ground on which

Perhaps the United States might furnish at least a harmonizing influence by the exertion of which the menace of this rivalry in military air power might be checked. In the House of Commons, on Wednesday, a member asked the Government if the American Congress had not passed a resolution advising that a conference be summoned on this question. The Home Secretary, being evidently ill-informed, asked for time in which to answer the question. The fact, however, is that nothing of the sort has been done or even proposed in Congress. A resolution suggesting a conference on the development of commercial aviation was introduced last year, but failed of action. No proposition has been brought before Congress having for its purpose international agreement

upon the limitation of military air power.

There could be no greater service rendered to the cause of world-wide peace than for the United States, which of all great nations is least endangered by rivalry in this form of military preparation, to suggest a conference which might accomplish for the air what the Washington Conference for the Limitation of Naval Armament did for the sea.

Editorial Notes

Some of the "punch" which Maine is putting into its liquor laws, to go into effect on July 1, should prove exceedingly effective in striking such a blow at the rumrunners, that they will find it impossible to recover from it. Much trouble has been experienced in the past because of the State's inability to hold autos which have been seized with rum. Just as it decided to confiscate them, someone would appear with a claim of a mortgage, and the car would be released by the courts. So the Legislature was persuaded to pass an amendment which it thinks will cover the whole ground. Drivers of all cars found with liquor must have the written permission of the owner or mortgagee of the vehicle to use the car. If caught without such permission they will be fined from \$500 to \$1000 and jailed for from six months to two years, and will also receive the usual penalties for possession and transportation. If the written permission is shown, then the car can be taken without hearing, for the owner will have convicted himself. If the driver owns the car, he will have it taken from him. + + +

It is gratifying to learn that it is the experience of those members of the British Prison Commission and of the Borstal Association, who have carried on camps for. boys and young men in the past, that they are of great value in implanting in them higher ideals and bringing out the better side of their natures. The Borstal Association, by the way, is a penal establishment, formally established in 1902, under state control, which is neither a prison nor a reformatory school. It has been found, for instance, that those lads who have been to a wellorganized camp no longer regard a rowdy and perhaps drunken revel as the type of holiday most to be desired, while a week in such an environment appears to teach self-control and good-fellowship more effectively than some months of institutional life. It makes the officers and lads better acquainted and prepares the lads for their life of freedom again. Such activities cannot be too heartily indorsed.

Co-operating for Humanity BYRAYMOND B. FORDICK, Former Undersee, Gen. League of Natio

The recent opium conference at Geneva, which was, in fact, the fifth session of the Advisory Committee on Opium of the League of Nations, is a characteristic reminder of the unceasing humanitarian work which is going forward automatically under the League's own impetus, and which is given all too little attention by most Americans. Like most of the League's efforts, it does not stand by itself; it is part of a continuous process. Its major preoccupation, the attempt to scale down the present production of opium to provide for the minimum standard needs of legitimate uses, strikes at the heart of the drug problem, and when the committee's recommendations come before the League Assembly and Council this fall, their fate will be watched with the greatest concern.

It is interesting for Americans to note that the three American delegates to the Geneva Conference were only unofficial observers, but they were appointed to that now familiar post by the Department of State. They included Representative Stephen G. Porter, chairman of the House Committee on Foreign Affairs; Bishop Charles H. Brent, and Mrs. Hamilton Wright—a very able delegation; Dr. Rupert Blue, assistant surgeon-general of the United States Department of Public Health, attended under similar auspices and in the same capacity last January. Despite the anti-League sentiment in the United States, it is difficult for America to refuse its cooperation with the League's humanitarian endeavors.

Consequently, the League's very large number of humanitarian activities, which, at first glance, seem to have but little relation to its primary purpose, the prevention of war, are of increasingly practical interest to America, and Americans are every day more definitely acknowledging that interest. To state only a few of these activities, besides the ones already mentioned, the League is fighting the international traffic in women and girls; it has committees for the return of prisoners of war, for care of refugees and their repatriation; it has a committee on intellectual co-operation; it is studying the possibility of suppressing the international trade in indecent literature; it is doing a score of things which no nation by itself can successfully undertake, because the problems involved overflow national boundary lines. Before the war, some of these matters were handled by spasmodic international conferences, called at the instance of particular countries. No centralized machinery of conference existed, however, and it was difficult, if not impossible, to build up organic, continuing relationships between nations on special humanitarian proble The League of Nations represents a natural development from this pre-war situation. It is the logical next step in the creation of an international technique.

The question is sometimes asked why the League should undertake these miscellaneous activities. Assuming that the chief purpose of the League is to stop war, what have the campaigns enumerated above to do with it? Or is there any relation between the traffic in opium and international disputes? What advantage is it to the League to become the clearing house for various international problems?

The advantage is very real. Great crises that threaten the peace of the world are not of frequent occurrence. They gather slowly and often quietly, but they break with violence. To meet these periodic storms, the world needs practice in the technique of common action. If, in relatively uncontroversial matters like the crusade against opium, the nations of the world can learn the value of common counsel, surely, should some great test arise, and another 1914 throw down its ugly challenge to mankind, there will be a better chance for sanity and self-control and a larger hope of escape from a world wreck of untold proportions.

But there is another reason why the League of Nations is dealing with all these humanitarian problems, and that is the growing dependence of nation upon nation in matters that pertain to public welfare. Modern physical science has bound the world together with intimate relationships, so that today there is more of common interest and interdependence between the United States and China, or between England and the South Sea Islands, than existed 100 years ago between the states of the American Union. The fact is that modern life, in all its phases, is rapidly overflowing national boundary lines.

The campaign organized by the League against the international commerce in opium and its derivatives should have particular mention. When the League, in 1920, took up this question, it found the machinery of international co-operation already partly developed. An international commi met at Shanghai in 1909, and a conference had been convened at The Hague in 1912, resulting in a convention for the international control of opium and similar drugs. Under the terms of this convention, the Netherlands Government had been designated as the depositary of ratifications and the collector of data respecting the traffic. In 1920, at the request of the Dutch Government, the League of Nations took over the duties of intermediary, and an advisory committee was appointed to keep in touch with the work and forward it by every possible means. This committee includes representatives of eight states: The Netherlands, Great Britain, France, Indfa, Japan, China, Siam, and Portugal. Dr. Rupert Blue of the United States acts as a member of the committee, in an "unofficial and consultative" capacity.

As a result of the work of this advisory committee, a ratification of the Hague convention, referred to above, is now practically universal, Albania and Esthonia being the only non-participants. A system for the exchange of information between nations has been put into effect, and, for the first time, international statistics are being collected as regards the trade, production, and manufacture of opium. With this information it has been possible to check up the activities of smugglers between various countries, which has resulted in several of the large-scale agents of the illicit trade being suppressed.

large-scale agents of the illicit trade being suppressed.

Smuggling presents the main difficulty in dealing with opium in countries which have accepted the convention, and the League has recommended that, in order to meet this situation, no import or export of the drug to or from any country shall be allowed for any purpose whatever, except under governmental license. This system has already been adopted, with promising results, by nearly forty members of the League. Finally, the League, through its advisory committee, is undertaking a broad survey, with the idea of limiting, if possible, world production of opium, which is, no doubt, the only fundamental way of dealing with the evil.

Thus, in various ways and on various questions, the resources of fifty-two nations are being harnessed together to secure results which are of incalculable benefit to them all. This humanitarian work might well be called a training school in international co-operation. It is serving to develop the habit of conference. It is emphasizing the value of common counsel when great problems have to be faced.
